

CalVision Bureaucracy

- Web page being formed at: <https://detectors.fnal.gov/projects/calvision/> (very complicated so my apologies for the slow progress... if only they used twiki!)
- Indigo at: <https://indico.fnal.gov/category/1426/>
- Mattermost channel available (via CERN... CERN is always so much easier)
- Hold meetings once/month second Wednesday 9 AM central?
- Publications
 - At the minimum we should inform our collaborators before submitting a publication based on this funding?
- Talks
 - Please let me know if you are giving a talk in this area so I can link to our web site?
- Yearly plan
 - I would like to include on the web site a plan for each year for each group. For 22, due 1 Sept? For 23 and 24, due 1 April? Also, at the end of the year, a summary of accomplishments (due 31 March)
- Interactions with IDEA
 - IDEA calorimeter meetings are held bi-weekly at 7 am central. I will attend from now on. Are there others willing to do this?
- Logo. Any artists among us who could design a logo?

mattermost

I hope we can use this to ensure new members can get access to past information, and people are not inadvertently left out. Especially note “Single Crystal measurements” and “simulations of single bars”, which we should start to use frequently.
