

Just a reminder that the Medical Device Sterilization Workshop hosted by Fermilab starts next Wednesday, September 21, at 8:30 AM CDT.

A Zoom webinar link will be emailed to each attendee on Tuesday, September 20th for access to the webinar.

There will be three presentations from developers of simulation and modeling programs. To help gauge what these programs should offer, we have set up a [survey](#) to help guide the development of these programs. The survey will close on Wednesday, September 21st at noon CDT.

Presenter biographies, a final agenda, and more are available [online](#).

For technical help or questions regarding the webinar, please contact [Tammy Gloss](#). Please contact any committee member with other questions or concerns.
