

Just a reminder that the Medical Device Sterilization Workshop hosted by Fermilab starts next Wednesday, September 21, at 8:30 AM CDT.

A Zoom webinar link will be emailed to each panelist/presenter on Tuesday, September 20th for access to the webinar.

- The email will come from Creative Services no-reply@zoom.us
- The subject line is Panelist for 2022 Medical Device Sterilization workshop
- Recipients should check their junk folder if the invitation does not arrive
- Please use the link included in the invitation email to connect to the webinar

The webinar will open 30 minutes early at 8:00 am CDT each day. You can connect early if you wish to test your audio, background, screen sharing, etc. Please arrive no later than 8:20 am.

There will be three presentations from developers of simulation and modeling programs. To help gauge what these programs should offer, we have set up a [survey](#) to help guide the development of these programs. The survey will close on Wednesday, September 21st at noon CDT.

Presenter biographies, a final agenda, and more are available [online](#).

For technical help or questions regarding the webinar, please contact [Tammy Gloss](#). Please contact any committee member with other questions or concerns.
