

Shielding Assessment Review Panel

Memorandum

Date: January 7, 2020

To: Matt Quinn, Chair – Radiation Safety Subcommittee
From: Keith Gollwitzer, Chair – Shielding Assessment Review Panel
Re: Neutrino Muon Beamline Shielding Assessment Addendum for E1039

Message:

The Shielding Assessment Review Panel has reviewed the *Neutrino Muon Beamline Shielding Assessment Addendum for E1039* documentation. Our review concludes that the addendum to the incremental assessment is satisfactory (methodology, completeness and compliance with the Fermilab Radiological Control Manual) for operation of the Neutrino Muon Beamline under the conditions defined in the incremental shielding assessment and addendum.

We recommend the acceptance of the *Neutrino Muon Beamline Shielding Assessment Addendum for E1039* (version 2.7) dated December 18, 2019.
