

Memorandum

February 29, 2012

To: Richard Ford, Chair, Shielding Assessment Review Committee
From: Nancy Grossman, ES&H Section Head / Senior Radiation Safety Officer
Subject: SeaQuest Shielding Assessment

I have reviewed your memorandum of February 28, 2012 recommending my acceptance and approval of the subject shielding assessment and support the conclusions of the Shielding Assessment Review Committee that you represent as Chair. With this approval I also endorse the concern your subcommittee transmitted in the February 28, 2012 communication that are reproduced here:

This shielding assessment is based on calculations and assumptions as to what shielding exists in the field and is therefore subject to uncertainties. It is imperative that a verification plan be implemented during commissioning and documented.
