

2x2 MINERvA Next Steps

N. Roy, A. Marino

High Priority Items

- Define working group structure, start having dedicated 2x2 MINERvA meetings, identify personpower
 - Simulation and reconstruction
 - Calibration and data monitoring
 - Integration and DAQ
- Define data processing plan
 - Run MC production at NESRC
 - Develop long term data storage plans
- Define plex

Analysis and CAFs

- What MINERvA info should be in the CAFs?
 - Track start, track end, range in material, ?
- Does it get attached to LAr reco info? Or is there a separate MINERvA reco structure?
- Does analyst do the track matching, or does LAr reco point to MINERvA matched track info?
