The chiral condensate at large N

Monday, 31 July 2023 16:20 (20 minutes)

We present preliminary results for the large- N limit of the chiral condensate computed from twisted reduced models. We followed a two-fold strategy, one consisting in extracting the condensate from the quark-mass dependence of the pion mass, the other consisting in extracting the condensate from the mode number of the Dirac operator.

Topical area

Vacuum Structure and Confinement

Primary authors: BONANNO, Claudio (IFT UAM/CSIC Madrid); BUTTI, Pietro; GARCIA-PEREZ, Margarita; GONZALEZ-ARROYO, Antonio; ISHIKAWA, Ken-Ichi; OKAWA, Masanori

Presenter: BONANNO, Claudio (IFT UAM/CSIC Madrid)

Session Classification: Vacuum Structure and Confinement
