## Spectroscopy of heavy-light mesons

*Tuesday, 1 August 2023 13:30 (20 minutes)*

We present updated results of the excited and exotic spectra of  $B$ ,  $B_s$  and  $B_c$  mesons. The calculations are performed on dynamical, anisotropic lattices with relativistic heavy quarks. A first look at finite volume effects and next steps are also discussed.

### Topical area

Hadronic and Nuclear Spectrum and Interactions
