[NUSTEC-NEWS] CTGWG NuSTEC seminar: Nuclear effects in neutrino-nucleus cross sections by Raúl González Jiménez (Complutense, Madrid)

LR NuSTEC new mailing list <NUSTEC-NEWS@LISTSERV.FNAL.GOV> on behalf of Luis Alvarez Ruso <Luis.Alvarez@IFIC> To: nustec-news Mon 11/14/2022 10:53 AM

Dear all,

The NuSTEC Cross Theory and Generators Working Group announces a new seminar on Wed. Nov. 16 at 9.30 am CT = = 16:30 CET = 00:30 (+1day) JST

**Title:** Nuclear effects in neutrino-nucleus cross sections  
**Speaker:** Dr. Raúl González Jiménez (Complutense, Madrid)  
**Abstract:** Within the framework of a relativistic mean-field model, I will discuss some relevant nuclear effects that affect neutrino-nucleus cross sections at the energies of interest for neutrino-oscillation experiments: Pauli blocking, binding energies, factorization and hadron final state interactions. I will stress the differences between this relativistic and quantum mechanical approach and the models and methodology that is inside the Monte Carlo neutrino event generators. The results that I will present are mainly based on

[NUSTEC-NEWS] MITP & NuSTEC workshop in Mainz -- announcement

JS NuSTEC new mailing list <NUSTEC-NEWS@LISTSERV.FNAL.GOV> on behalf of Joanna Sobczyk <jsobczyk@UNI-MAINZ.DE> To: nustec-news

Dear Colleagues,

We are pleased to announce the MITP workshop **Neutrino scattering at low and intermediate energies**, organized in collaboration with NuSTEC Germany on **June 26-30, 2023**. More details are available on the meeting website: <https://indico.mitp.uni-mainz.de/event/324/>.

The workshop will be focused on neutrino-nucleus interactions at energies of tens to hundreds of MeV. Examples of these include studies of  $\alpha$ -nucleus scattering, supernova neutrino detection, and accelerator based neutrino oscillation experiments. The workshop will be dedicated to d

[NUSTEC-NEWS] International Neutrino Summer School 2023

MB NuSTEC new mailing list <NUSTEC-NEWS@LISTSERV.FNAL.GOV> on behalf of Minerba Betancourt <betan009@FNAL.GOV> To: nustec-news

Dear Colleagues,

We are glad to announce that the 14th International Neutrino Summer School (INSS) will be hosted at Fermi National Accelerator Laboratory, 7 to 18, 2023, sponsored by the Neutrino Physics Center (NPC) at Fermilab. We expect to have a limited number of scholarships available, c

qualified students in need of support.

For the past fifteen years, the International Neutrino Summer School has convened at locations around the world to provide training for the n

### 2022

- February 2, 2022, "New CC0pi GENIE Tune for MicroBooNE", Steven Gardiner (FNAL)
- March 9, 2022, "Final-State Interactions in inclusive and exclusive one-nucleon knockout", Alexis Nikolakopoulos (FNAL)
- April 13, 2022, "Study of final-state interactions of protons in neutrino-nucleus scattering with INCL and NuWro cascade models", Anna Ershova (Saclay)
- June 7, 2022, "Achilles: A Modern Theorist-Driven Event Generator", Joshua Isaacson (FNAL)
- October 19, 2022, "An Altarelli Cocktail for the MiniBooNE Anomaly?", Vedran Brdar (CERN)

# Support from Fermilab Office of Communication:

- Jon and I met with Kurt Riesselmann at Fermilab's office of communications
- Ket takeaways:
  - Symmetry Magazine Article: Potential to write a symmetry magazine article highlighting unique and special aspect of the story of NuSTEC:
    - we bring Theory/Experiment/Generator as well as a HEP/NP communities together, international collaboration, etc. focused on improving the physics of neutrino experiments
    - send a few key points to Kurt, he will forward that to Kathryn Jepsen of Symmetry
  - If we are interested, we can draft a few sentences and share with the board before passing it on to Kurt.
  - Internal FNAL Article: They can write an internal article that can go to Fermilab Today
  - Social Media Support: They are understaffed but are planning to hire a new person next year. Kurt suggested that we can meet with that person next year and help get our social media post boosted, etc.
