

**Many thanks to all the conveners and speakers
for making this workshop a successful event**

This has been a very productive (and fun) workshop

Moving forward: three main themes have emerged during the discussions

- Summarize the workshop content and R&D directions in a written document
 - Useful for future discussions
 - Advertise in each collaboration and during upcoming CLFV 2023 conference
- Set up a website to collect material on AMF and serve as a gateway
 - Will see if we can set this up at Caltech
 - Mu2e-II already has a document server, but welcome to move
- Strengthen communications between the different experimental efforts
 - Share expertise
 - Develop common tools
 - Stronger community and message

Very beneficial to summarize the workshop content in a written document

Content

Each session convener(s) summarizes the session content - a few pages

- Overall summary
- List of R&D topics (somewhat prioritized)
- Synergies with other efforts

Edition

Frank and myself will serve as editors (and spam your mailbox)

Timeline

We would like to have the document ready for the CLFV 2023 conference

How do we follow-up discussions in the future?

- Do we keep Mu2e-II and AMF discussions in the same meeting?
- Discuss the organization of future efforts at the CLFV conference?

ENJOY THE SUMMARY TALKS
