# CMS Open Data Workshop

July 11<sup>th</sup> - 14<sup>th</sup>, 2023 *Fermilab, LPC, Batavia, IL USA*

## Organizing Committee

Matt Bellis (Siena College)  
Edgar Carrera Jarrin (San Francisco de Quito U.)  
Julie Hogan (Bethel University)  
Clemens Lange (Paul Scherrer Institute)  
Kati Lassila-Perini (Helsinki Institute of Physics)  
Thomas McCauley (University of Notre Dame)  
Sezen Sekmen (Kyungpook National University)

## Local Organizers

Gabriele Benelli (Brown University)  
Irene Zoi (FNAL)

## Facilitators

Vincenzo Morina (Siena College)

Join us for the fourth iteration of this workshop! Previous participants and new attendees are equally welcome.

CMS has released 3 petabytes of data and simulation samples to the general public through the CERN Open Data Portal. At this workshop, you will be walked through the process of accessing and analyzing the data, with a focus on Run II data and how to perform a full analysis.

Four days of hands-on exercises and tutorials. Feedback will also be solicited from attendees on how to make the CMS Open Data experience easier and more fruitful for users.
