

Token Task Force Meeting

Lisa Goodenough

26th April 2023

Agenda

- **News**
- **Open Discussion**

News

- **REMINDER: Phase 3 of jobsub_lite Rollout has been postponed to May 17, 2023**
 - Plan to make the change on April 5th was scuttled when it was observed that the jobsub_lite condor schedds were performing poorly (not going to discuss the issues here)
 - jobsub_client submissions (on jobsub03) will be disabled
 - jobsub03 will complete all jobs in the queue and will be available until June 21st for retrieval of logs from those jobs
 - Please submit jobs using jobsub_lite and open a ticket if you have problems!
- **Experiments, please test token-weakening on the test interactive nodes!!**
- **No new jobsub_lite release this week**

Open Discussion

- **DUNE has opted not to use the standard token weakening provided by jobsub_lite - they need an alternative mechanism for providing storage.modify scope**
 - Temporary solution is to design a special “interactive” role for users who need to write to dCache persistent area or who need the *storage.modify* scope for their work
 - Problem is that FERRY doesn't have a way to auto-assign more than one role to someone when they are added to an experiment - you get one FQAN by default and thus one capability set
- **What is the current situation on plans to add non-Fermi users to the FERRY database?**
- **Other topics?**
