# Tutorials

- This has a few different parts:

  - (Probably debugging container runtime issues)

  - Running event generators

  - What is NUISANCE?

  - Exploring the output with NUISANCE flat trees

  - Comparing and tuning models to data with NUISANCE

- In order to participate fully, you need:

  - To download the software container (~1.1 GB)

  - To be able to run the software container & the ROOT GUI

  - To have a few example files locally (~1.6 GB)

# Tutorials

- Instructions for all of these topics here:
  https://github.com/NUISANCEMC/tutorials/blob/main/interactive/README.md

- Supplemented with slides in some areas

- If you spot an issue, say so! We can update the documentation

- Speaking of, if you already downloaded the tutorial github… pull it again...
