

FNAL Test Beam Schedule Update

Grace Cummings

CalVision General, 14 September 2023

TL;DR - Schedule not out yet

- Hope to have news closer to the end of the month
 - Still unsure exact end of shutdown
 - This came from the test beam managers
- Need a TSW (experiment number)
 - Current been operating under CMS Endcap Timing Layer - we need our own
 - Probably need two
 - One for crystal setup
 - One for fiber HCAL setup
 - Need to write document
 - One-pager describing the setups
 - Especially important for the fiber HCAL which needs a large motion stage
 - Example (behind FNAL Services login)
 - <https://fermipoint.fnal.gov/service/tsworc/Lists/tsworc/DispForm.aspx?ID=4440>
