Org Chart

Safety issues

- Flashlights now required for ALL enclosure accesses
 - We're buying some to be stashed in MI-8, MI-65, and BTW
- Exposure limits coming down
 - 1000mrem/yr, ALERT at 250mrem/qtr
 - We should NOT be approaching even these levels. If we are, let's take a close look at our procedures!
- Doors can be left open during active work if required by safe work plan
 - BUT, must be actively policed by work crew and closed immediately upon completion
- I've requested new signage for tornado shelter
 - Are there other places we need additional clarifying signage for other safety reasons? Places we have too many signs?
- We're in the yellow on training (currently < 93% compliance)
 - We MUST be completing required training ... no more safety pauses please!
 - If you have overdue training because you no longer require that training, work with your supervisor to update your ITNA and get it off there

TSD Emblem ... and the winner is!

Friendly reminder

- We have no budget for food for the Topical Meeting, or for the coffee in the Grotto.
- We rely on your donations to the food fund in the little plastic box.

Thanks!
