

# AQNET Fermilab Update

Andrew Cameron

November 14<sup>th</sup>, 2023

# Who am I?

---

- From Charlottetown, Prince Edward Island, Canada
- Undergrad in Physics @ UPEI (Spring 2017)
- Quantum Optics PhD @ Waterloo University (Summer 2023) Supervised: Kevin Resch

# Geographical Locations

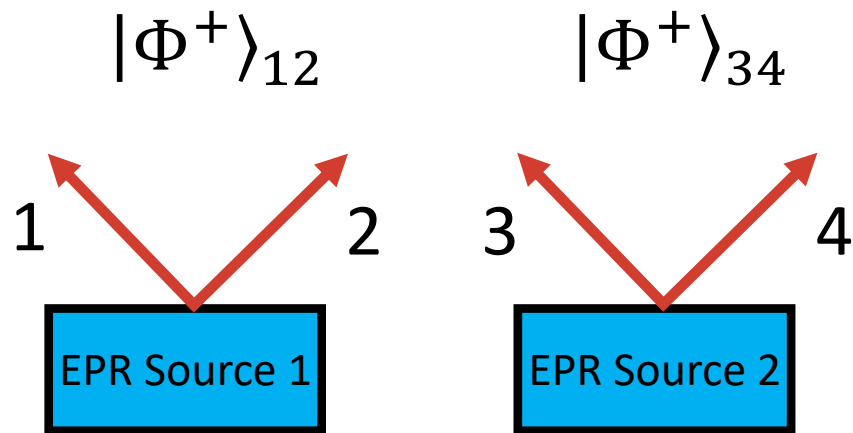

# D0 Node

Entanglement Swapping Testbed

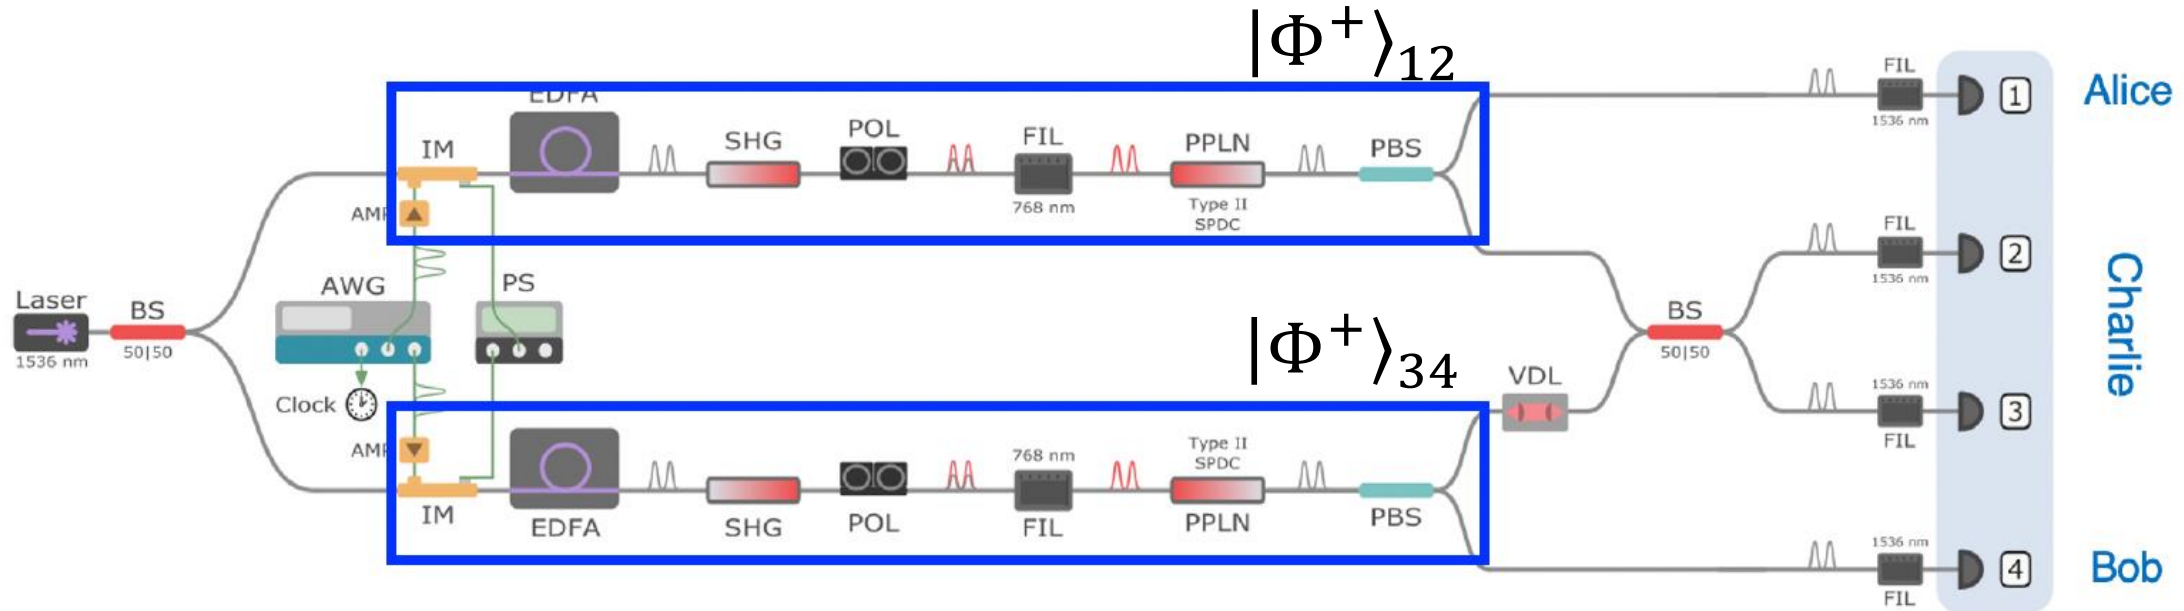

# Entanglement Swapping Theory

$$\begin{aligned} |\Psi\rangle_{1234} &= |\Phi^+\rangle_{12} \otimes |\Phi^+\rangle_{34} \\ &= \frac{1}{2} (|ee\rangle + |ll\rangle) \otimes (|ee\rangle + |ll\rangle) \\ &= \frac{1}{2} |\Psi^+\rangle_{14} |\Psi^+\rangle_{23} + \frac{1}{2} |\Psi^-\rangle_{14} |\Psi^-\rangle_{23} \\ &\quad + \frac{1}{2} |\Phi^+\rangle_{14} |\Phi^+\rangle_{23} + \frac{1}{2} |\Phi^-\rangle_{14} |\Phi^-\rangle_{23} \end{aligned}$$

A projective measurement of photons 2 and 3 in the **Bell basis** entangles photons 1 and 4

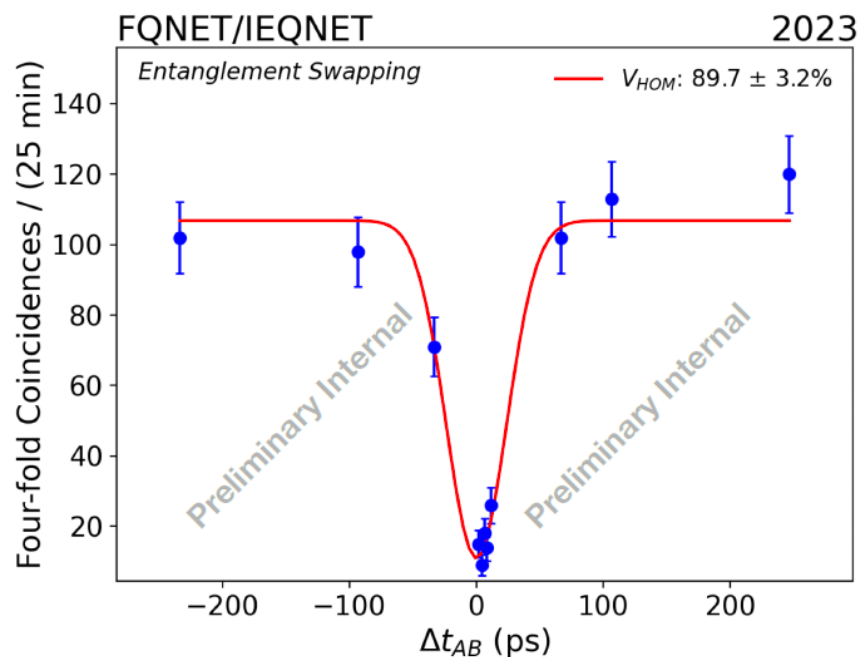

# Experimental Setup - D0 Swapping

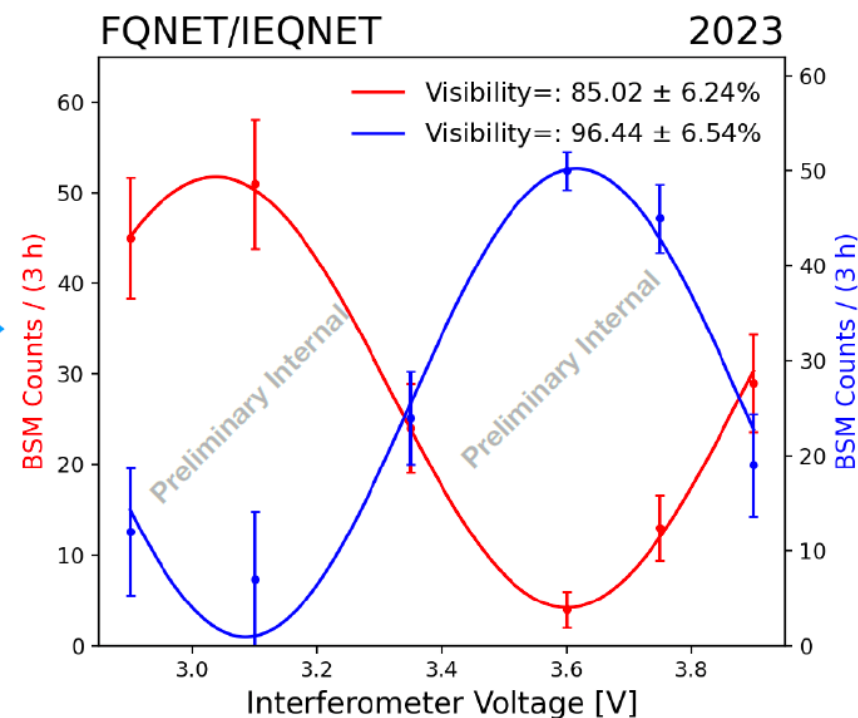

# D0 - Preliminary Results

## Hong-Ou-Mandel Effect

4-fold HOM dip with high visibility

## Swapping Visibility

High swapping visibility (x-basis)

# FCC Node

# Modifications for New FCC Source

Fiber Bragg Grating → Etalon Filters

# Fermilab Campus Network

- Swapping between two D0 sources

Manuscript in preparation

- Swapping between two FCC sources

One source built

- Swapping between FCC – D0

2024

# Where we're headed

---

- Working on coexistence of Classical and Quantum signals
- Adding high-rate sources to the network
  - Upgrading existing SNSPDs to lower jitter.
- Swapping between Fermilab and Argonne
