

Tales from the LPC

1

- [INC000001166360](#): still open for Alma9 lxplus9, and different error cmslpc-e19-heavy01: any progress? Had a user ask about this, I sent them to lxplus8 (batch with MY.WantOS = "e18" which is lxplus HTCondor method)
- Dave: send me draft of words to announce new nodes on our lists: https://uscms.org/uscms_at_work/physics/computing/getstarted/uaf.shtml#nodes
- `/etc/motd` on `cmslpc-e19-heavy01.fnal.gov` needs adjusting (eos and condor work), remove that line:
Nodes are under development and do not have HTCondor and other things may fail
- [INC000001167171](#), newly didn't recognize DesiredOS = "rhel7", see HTCondor
- LPC computing discussion Wednesday, Jan. 31, 2pm
