

2024 All Engineers Retreat

Contribution ID: 46

Type: **not specified**

3D Printing

Tuesday, 20 February 2024 11:00 (55 minutes)

Topic: 3D Printing

See how groups across the lab are using 3D printing to accelerate their work and how you can leverage on-site and external 3D printing resources for your next project. Learn how your group can set up a local 3D printer with minimal overhead, as well as a few design tips for 3D printed components. This session will also discuss what we know so far about 3D printed components in accelerator-specific applications such as cryogenic, high-voltage, vacuum, and radiation environments.

Presenter: CURFMAN, Noah
