

Call for PDS Shifter and Detector Analysis Team For the NP04 Run

Alessandro Minotti

Shifts and Analysis

- Following the [discussion during the collaboration meeting](#), we want to prompt a discussion on which scheme to adopt
- For PDS Shifts
 - Onsite team consisting of 1 coordinator, 1 shifter, and a DAQ expert (~3 people onsite)
 - One-week shifts, from Sunday to Saturday (to facilitate travel); two-week periods are encouraged (for continuity) but in principle not mandatory
- For the “Detector Analysis”
 - One coordinator (Laura) and a few task forces on clearly identifiable topics

Call for Manpower

- I've prepared a [shared document](#) where people can put their availability
- We want to issue a call for shifters and analysis team members
 - A preliminary call with Italian institutions was already issued by Francesco, and we had positive response from all our institutions and other members as well
 - A global call should be planned soon, with the aim of maximizing involvement: I can prepare an email to circulate among you before sending to the whole consortium
- Once the call is issued and people start filling the shared document, we can discuss, correct for empty slots, reiterate
