

Questions

Questions to help organize tutorials/talks and perhaps a set of reports on the group's projects and progress with some time for discussion of issues and techniques:

- Individuals involved?
- Their status (student, postdoc, senior)
- Experience in detector physics and TCAD
- Goals - What they want to learn
- Is it for a specific project or class of projects?
- Is the software accessible to them?
- Are they interested in tutorials?
