

- [INC000001167620](#) New complaints about coffea workflow failing T1_US_FNAL_Disk with (also cmsxrootd.fnal.gov)
 - OSErrors: XRootD error: [FATAL] TLS error: resource temporarily unavailable in file root://cmsdcadisk.fnal.gov//dcache/uscmsdisk/store/mc/Run3Summer22NanoAODv12/GluGluHto2B_PT-200_M-125_TuneCP5_13p6TeV_powheg-minlo-pythia8/NANOADSIM/130X_mcRun3_2022_realistic_v5-v2/50000/c9157d73-7ac2-49e5-b8e7-08d5a984d4ad.root
 - possibly related to xrootd version (user noted this started failing last week and had worked before), and newer version of coffea fixes it even though they were blaming infrastructure for awhile
- User complains cannot use EL8 condor (works in SL7) because voms-proxy-info commands do not work, and then remove voms commands and xrdcp times out with **Run: [ERROR] Operation expired: (source)**
xrdcp root://cmsxrootd.fnal.gov//store/group/lpcfnano/rkansal/v2_3/2017/TTbar/TTToHadronic_TuneCP5_13TeV-powheg-pythia8/TTToHadronic/220705_160139/0000/nano_mc2017_1-11.root .
- Dave: send me draft of words to announce new nodes on our lists: https://uscms.org/uscms_at_work/physics/computing/getstarted/uaf.shtml#nodes
- [INC000001167171](#), didn't recognize DesiredOS = "rhel7", Farrukh working on it (just noting, no action needed now, user has a workaround)
