CSAID operations report

Merina Albert on behalf of CSI group
Feb 6th, 2024

GPGrid:

- Alma 9 conversions have started, gpcollector04 is in progress, and the already converted alma 9 workers were added to the pool.

- We have banned CMS jobs from running until CMS upgrades condor versions for their glideins

- We have asked condor team to add fixes from condor 23.x to the long term support release, so we won't be required to run rolling release versions of condor.

(ref:Glidein issue on Alma 9 with condor version less than 23.3.1)

Dune Global Pool:

- Upgraded condor version for pilot to 23.x to avoid issues with condor not running on Alma 9 through glidein

Fermilab

CMS:

- CMST1:

  – Pushing new docker container images for CMST1/LPC . This includes xrootd version update.

- CSAID Ops report CMS SI section:

  – upgrade to Alma9 in progress for SI collectors/ccb machines and wmagents.

  – testing of condor23 for pilot condor tarball will be conducted in ITB soon
