

# Updates on PDS Shift Planning For the NP04 Run

Alessandro Minotti

# Proposed Scheme for Shifters and Experts

- Run Coordinator (Anselmo and I)
  - Onsite for most of the time
  - Plans the data taking for the different physics and hardware goals
- PDS Experts (PDS, calibration system, DAQ)
  - On-call or onsite (DAQ is probably the most problematic)
  - Weekly (or longer) shifts (Sunday to Saturday)
  - One-week shifts, from Sunday to Saturday (to facilitate travel); two-week periods are encouraged (for continuity) but in principle not mandatory
- PDS Shifters
  - More of a data quality shifts (there will be ProtoDUNE shifters 24/7 for the data taking)
  - Onsite
  - Weekly or longer shifts (Sunday to Saturday), we encourage longer periods

# Next Steps

- Fill the [shared document](#) with your availability
- Weekly training next week, to form future experts
- An official call for shifters to be issued soon
