

Tales from the LPC

1

- Still catching up - *not yet 100% return* from being out sick
- Dave: Automate nobackup quotas ticket made, assigned to you: [RITM2018905](#)
- New nodes: Discuss reduction of SL7 and increase EL8/EL9?
- Dave: send me draft of words to announce new nodes and reduction schedule on our lists: https://uscms.org/uscms_at_work/physics/computing/getstarted/uaf.shtml#nodes
- [INC000001168294](#) (missed that ticket last week), user had ROOT RDataFrame failures at a higher frequency with T1_US_FNAL_Disk files: correlated with data challenge. I also recommended trying newer xrootd versions in newer ROOT (Alma9) versions if that may help
- Not everyone who privately emailed while I was out sick opened a ticket, unsure if every issue resolved
- LPC computing discussion Wednesday 2pm
