

- Nanorc miscellaneous work for v4.4.0
- OKS: release v5.0.0 (first RC) + presentation at the general meeting
 - Still some small things before the release is out (timing? drunc?).
- K8s issue with PM (testing) resolved to using longer timeouts. It's unclear what the status of testing is right now.
- Influx DB issues (number of tags exceeded): create a new table (and move the old one to _old, in the future, we want to upgrade to influx v2 since v1 is deprecated)
- Pawel starts at IC next week
