Low Energy Physics Working Group update

Clara Cuesta and Dan Pershey
April 17th, 2024

Updates

- Low energy sample production:

    - VD 1x8x14 HD and HD 1x2x6 external backgrounds under validation $\rightarrow$ to be discussed later by Pablo and Sergio.

- Background group: documentation on Background model V3.

- Supernova pointing:

    - Paper status.

    - Michael Wang rehearsal on April 18 at 9am CT for the talk "Intermediate level supernova pointing trigger for DUNE using in-storage AI" at the 24th IEEE real time conference next week.

- Contact us if interested in presenting at a LEP session (including background-related topics) in the Collaboration Meeting on May 20-24th.
