

America's path to a Muon Collider:

A conversation with Congressman Bill Foster

Moderator: Pushpa Bhat

From the 2023 P5 report --

..a muon collider presents an attractive option both for technological innovation and for bringing energy frontier colliders back to the US.

Although we do not know if a muon collider is ultimately feasible, the road toward it leads from current Fermilab strengths and capabilities to a series of proton beam improvements and neutrino beam facilities, each producing world-class science while performing critical R&D toward a muon collider. At the end of the path is an unparalleled global facility on US soil. This is our Muon Shot.
