

VD Coldbox PNS runs (April 24)

Vitaliy Popov

Overview

Runs with PNS (TPC+PDS) since 16.04.2024.

Running now

Reading out 10 DAPHNE channels: 0-7, 10-17, 20-27, 40-47, 1, 36;

All channels are in the streaming mode;

Readout window — 65536 clock ticks (~ 1 ms);

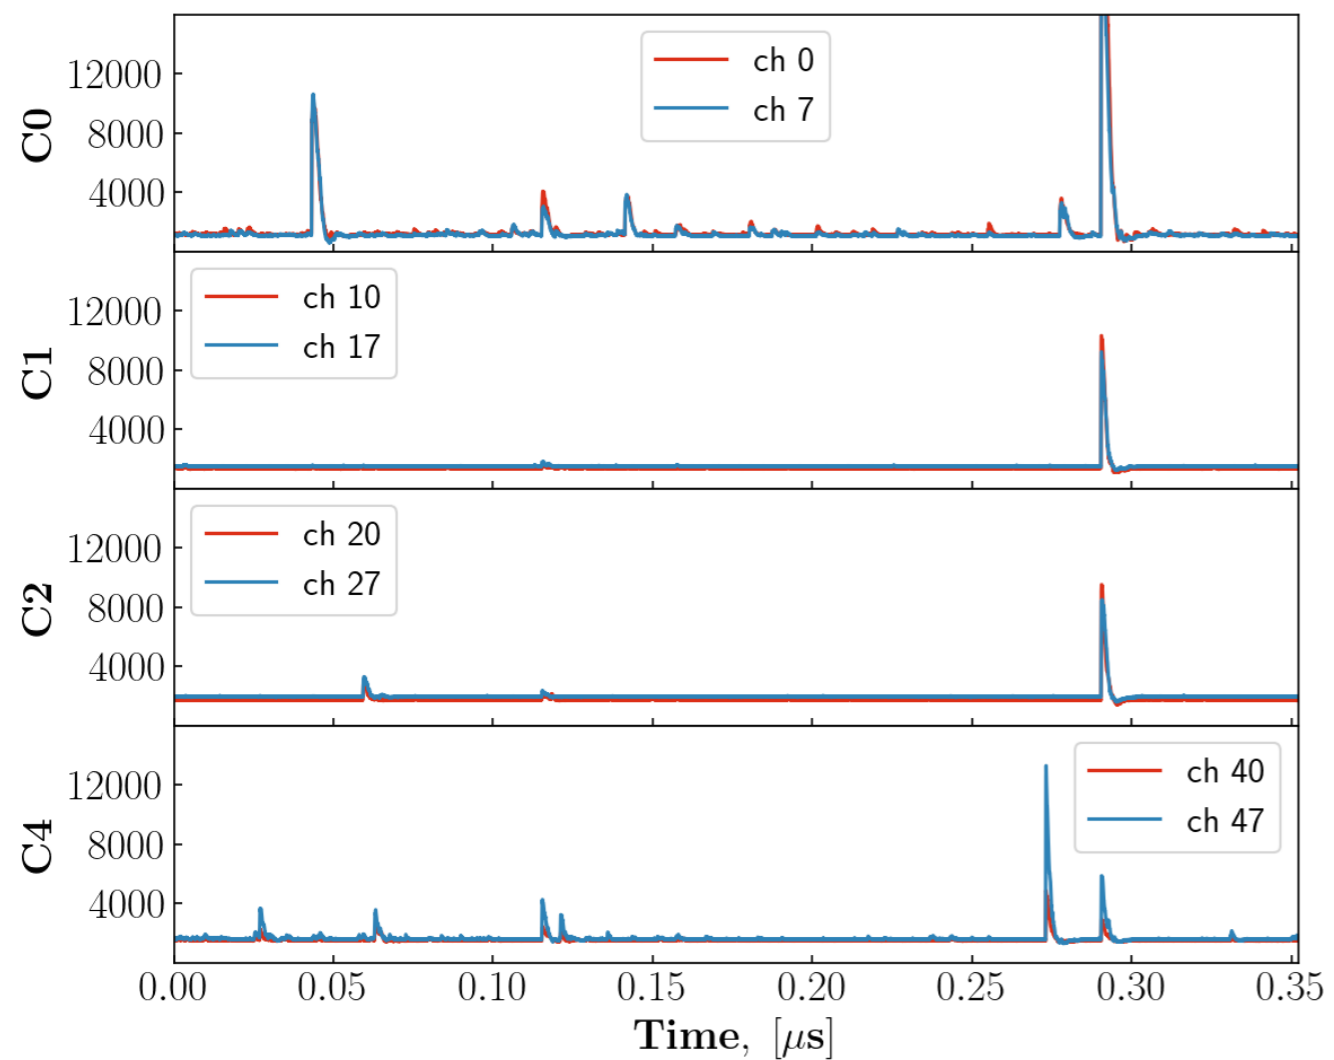

Trigger — 4 Hz (80 Hz from PNS prescaled);

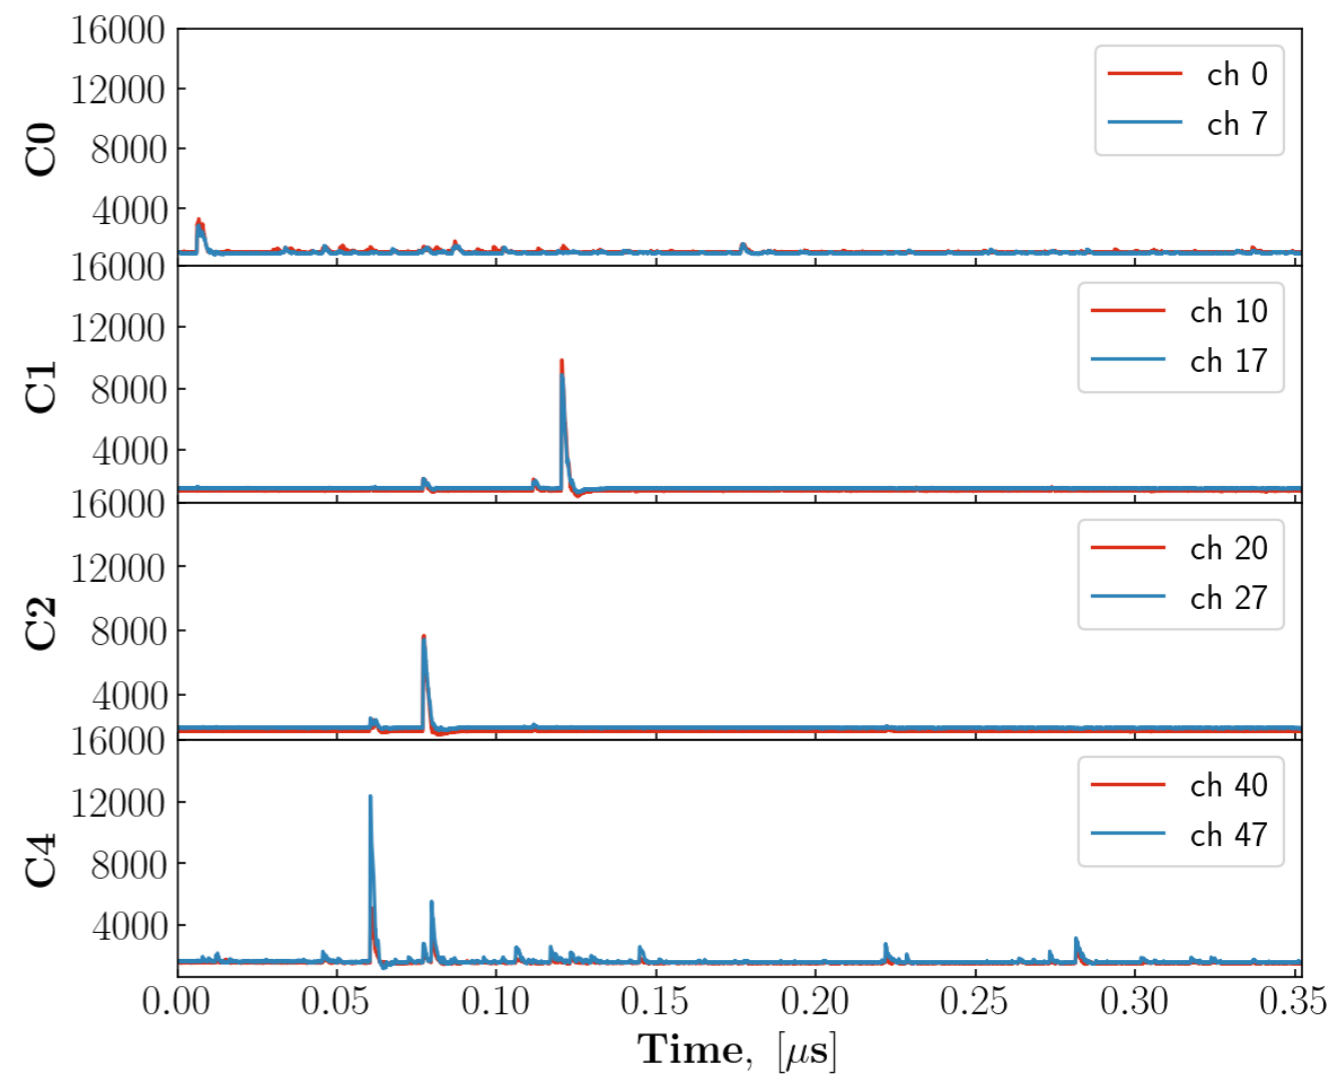

Waveform examples

Run 25034 Record 36

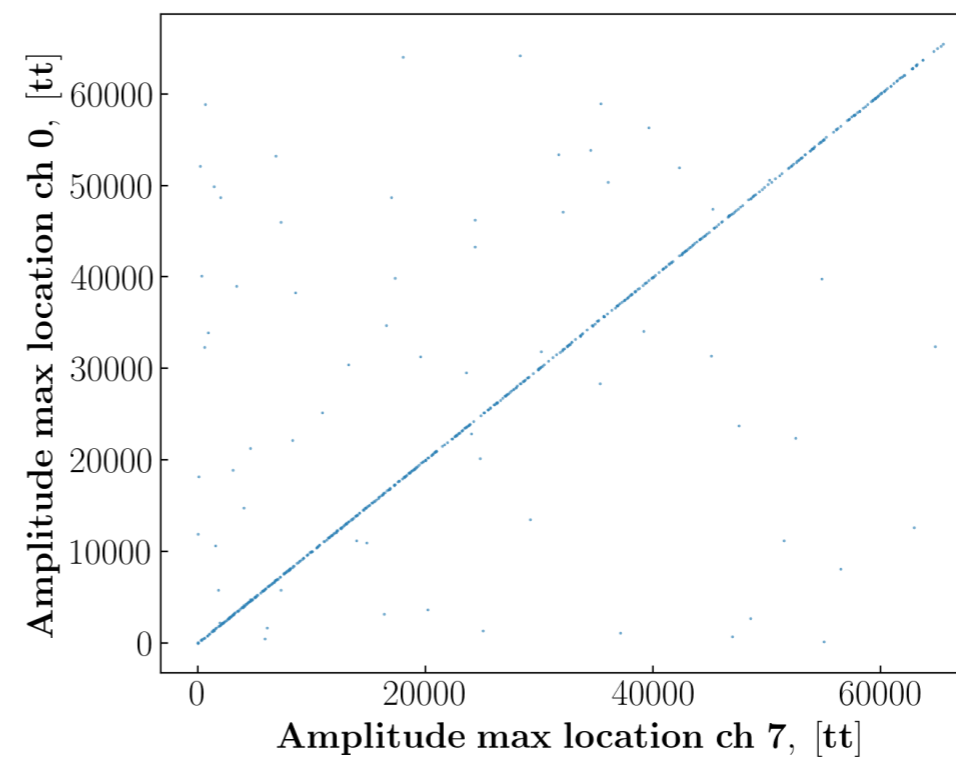

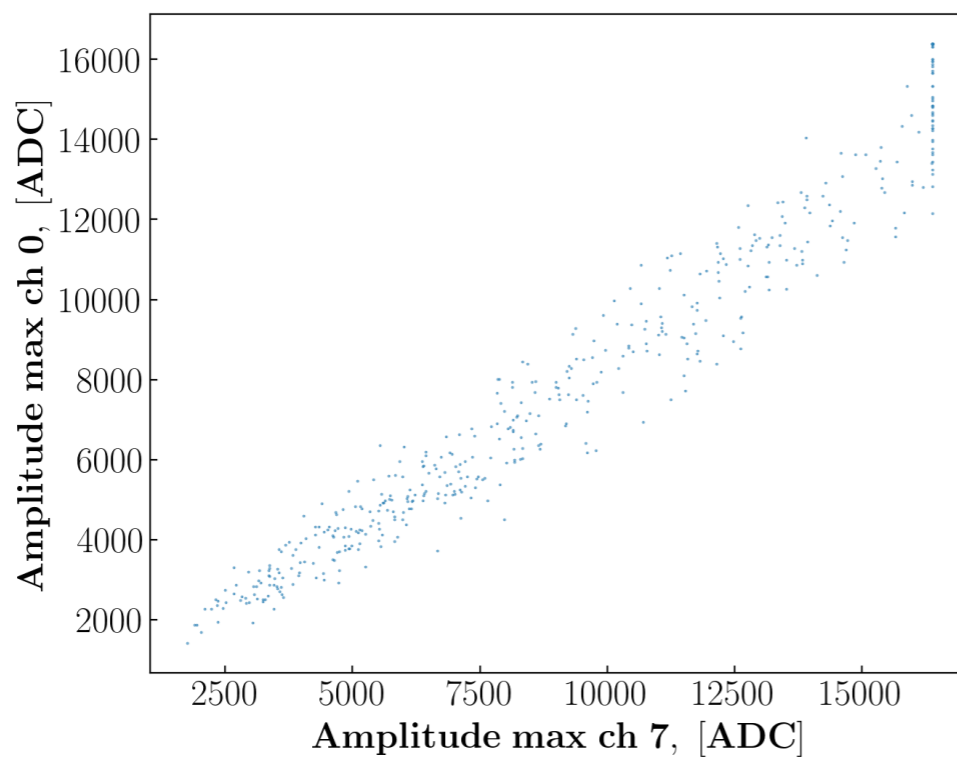

Run 25034 Record 15

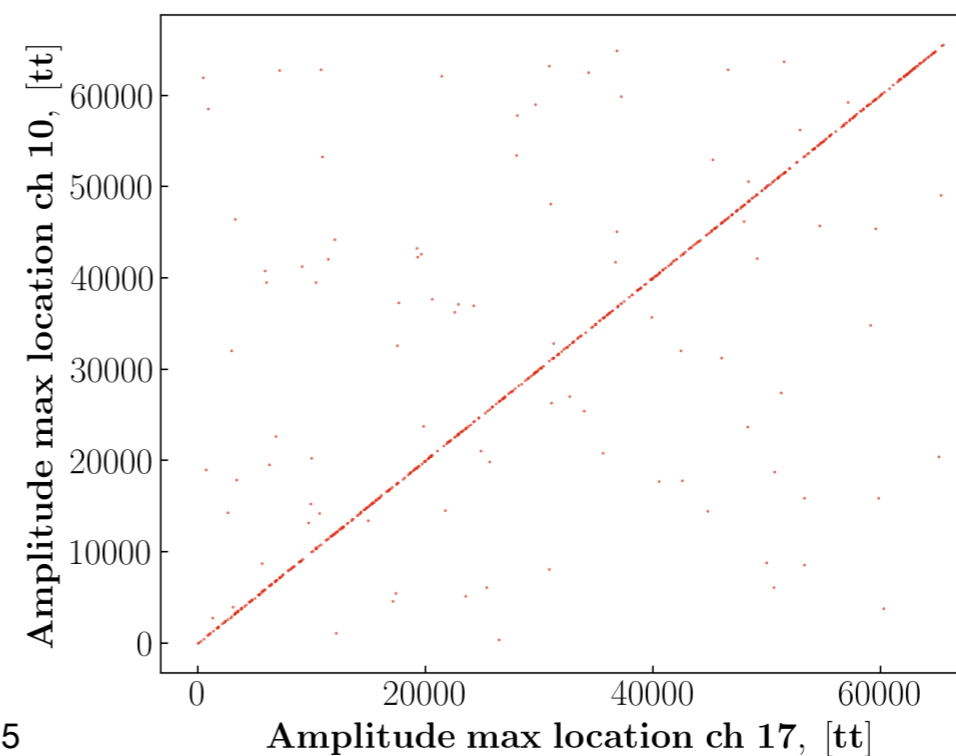

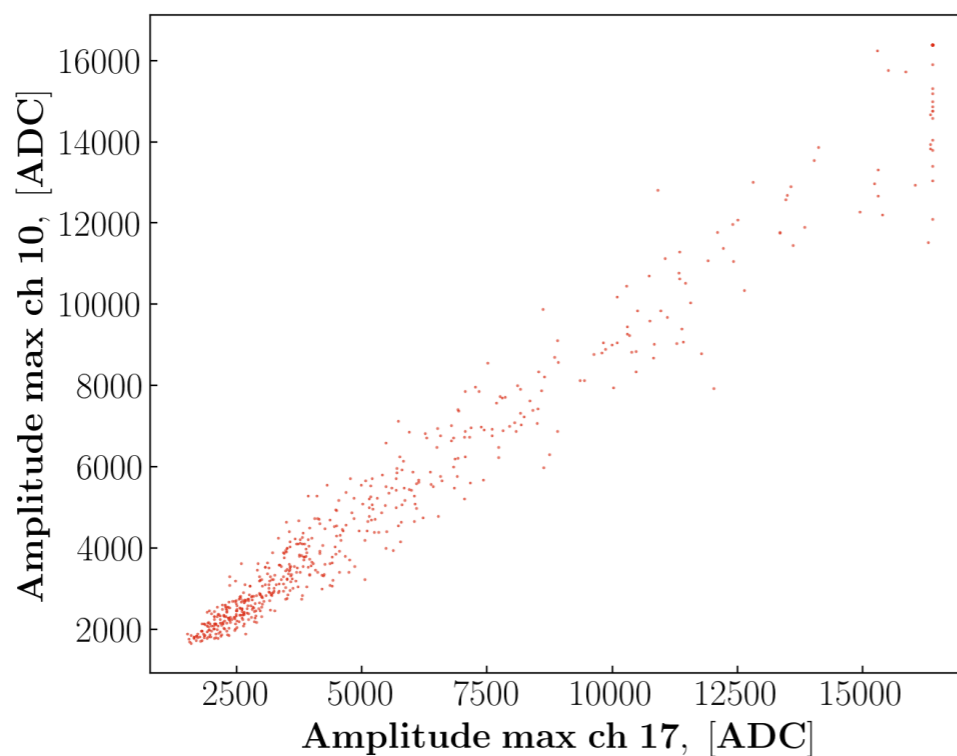

Module channels

Channels 0-7

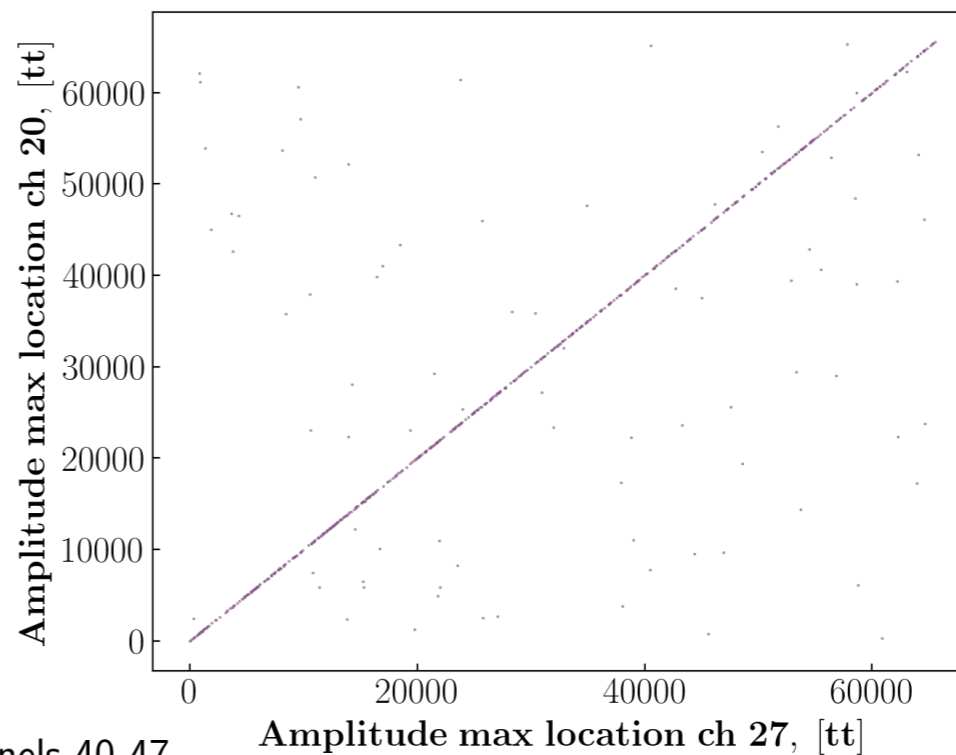

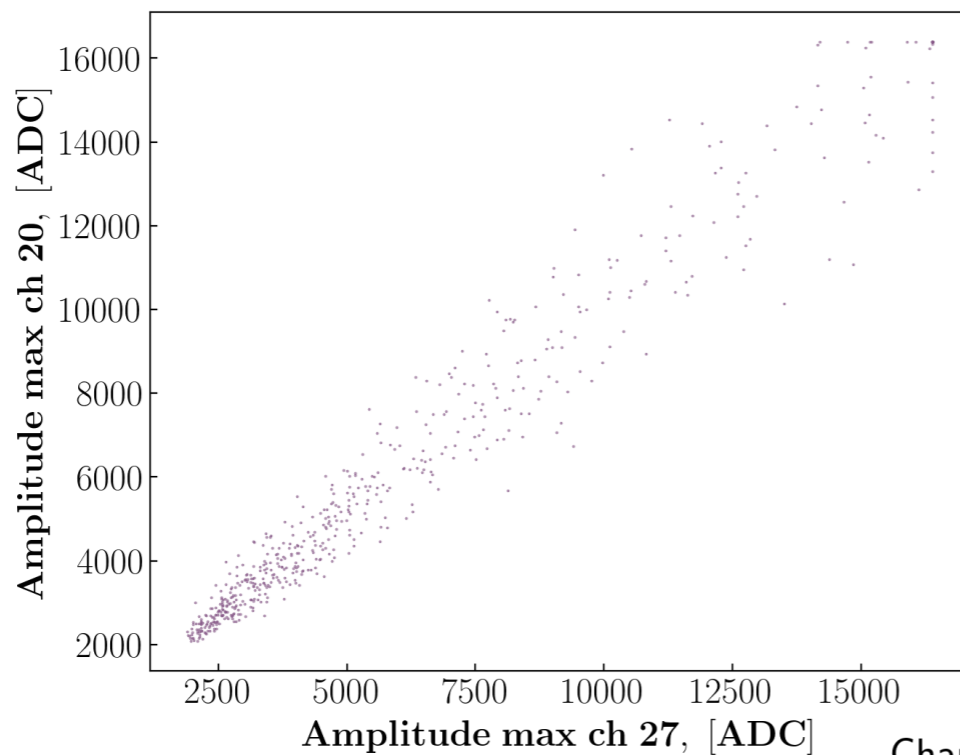

Channels 10-17

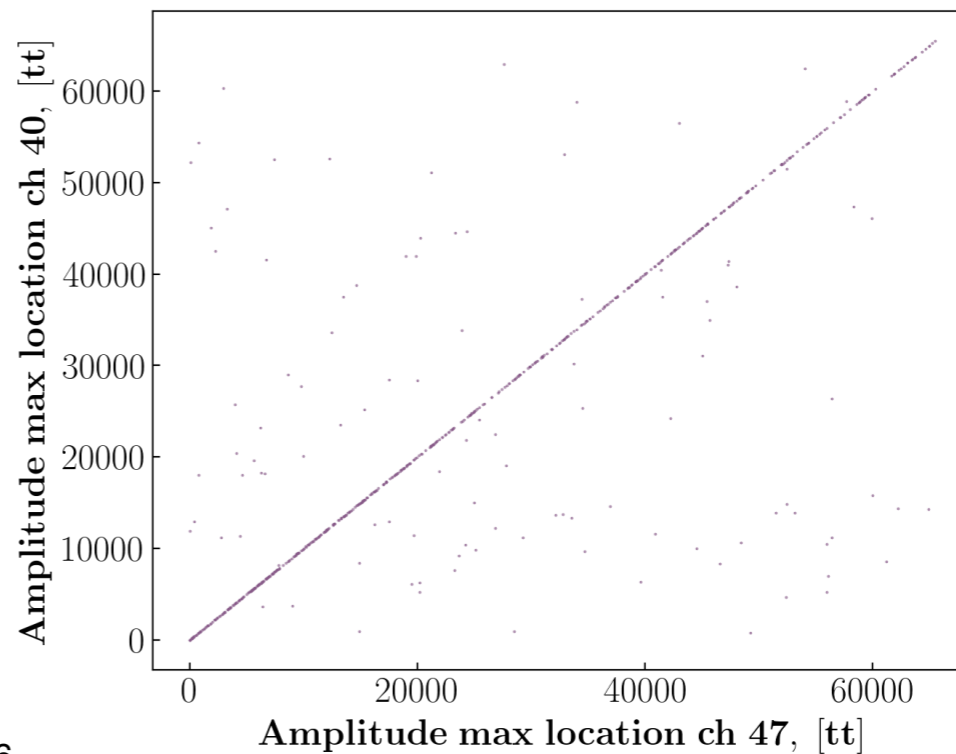

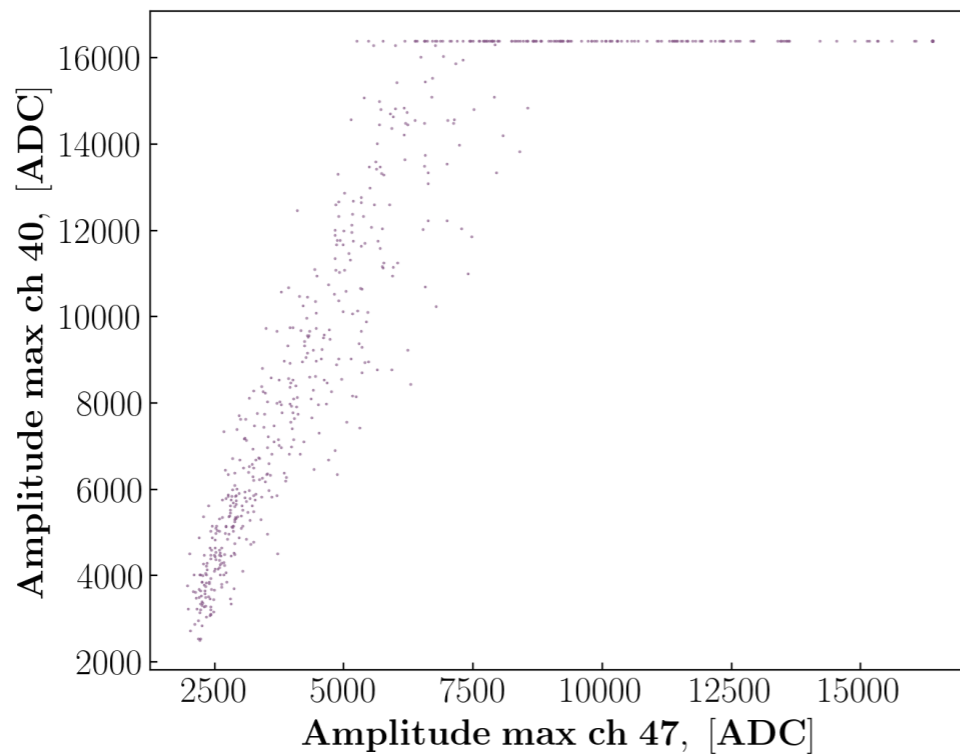

Module channels

Channels 20-27

Channels 40-47

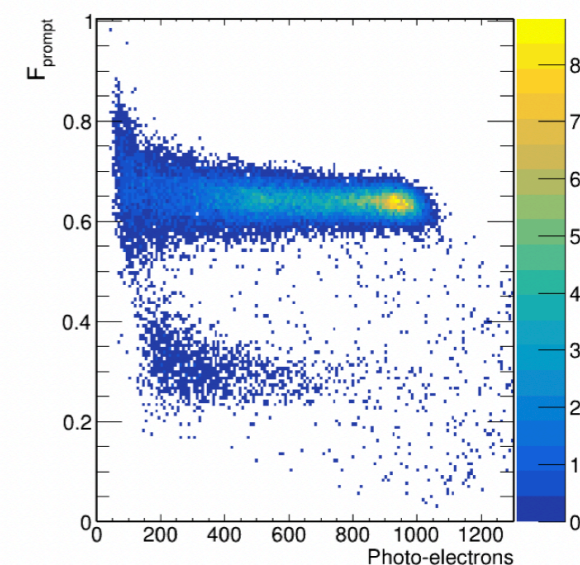

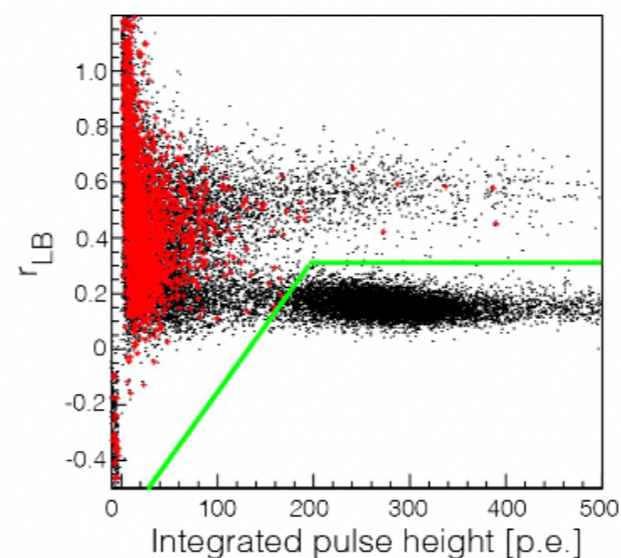

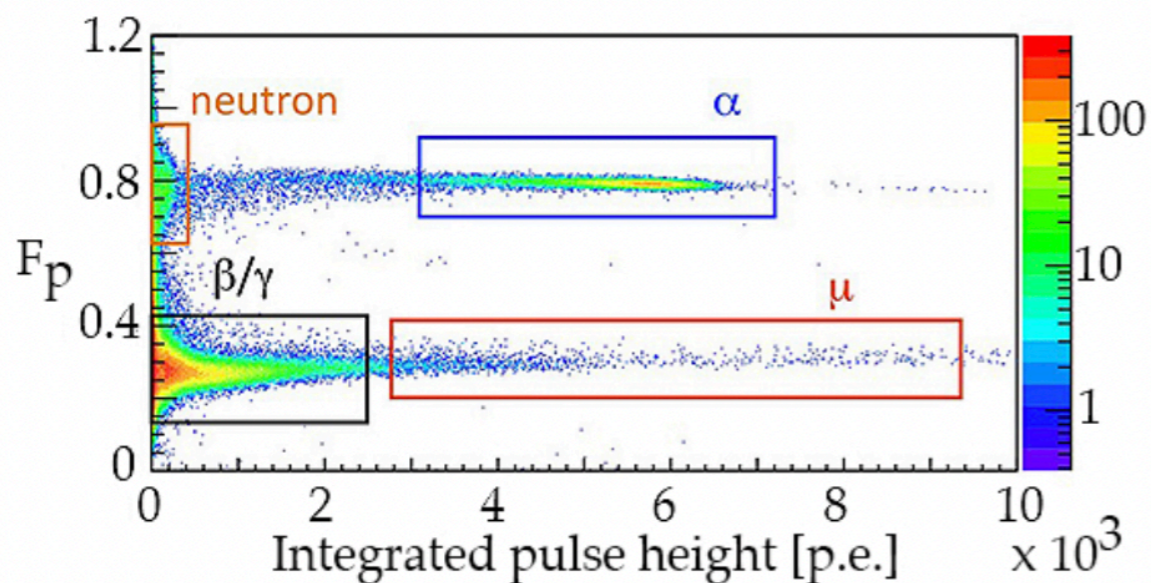

Pulse shape discrimination

Main goal: Neutrons identification in DUNE with light Pulse Shape Discrimination (PSD) technique.

[*JINST* 10 (2015) 08, P08002]

[*Phys. Rev. B* **27**, 5279]

[*JINST* 16 (2021) 09, P09027]

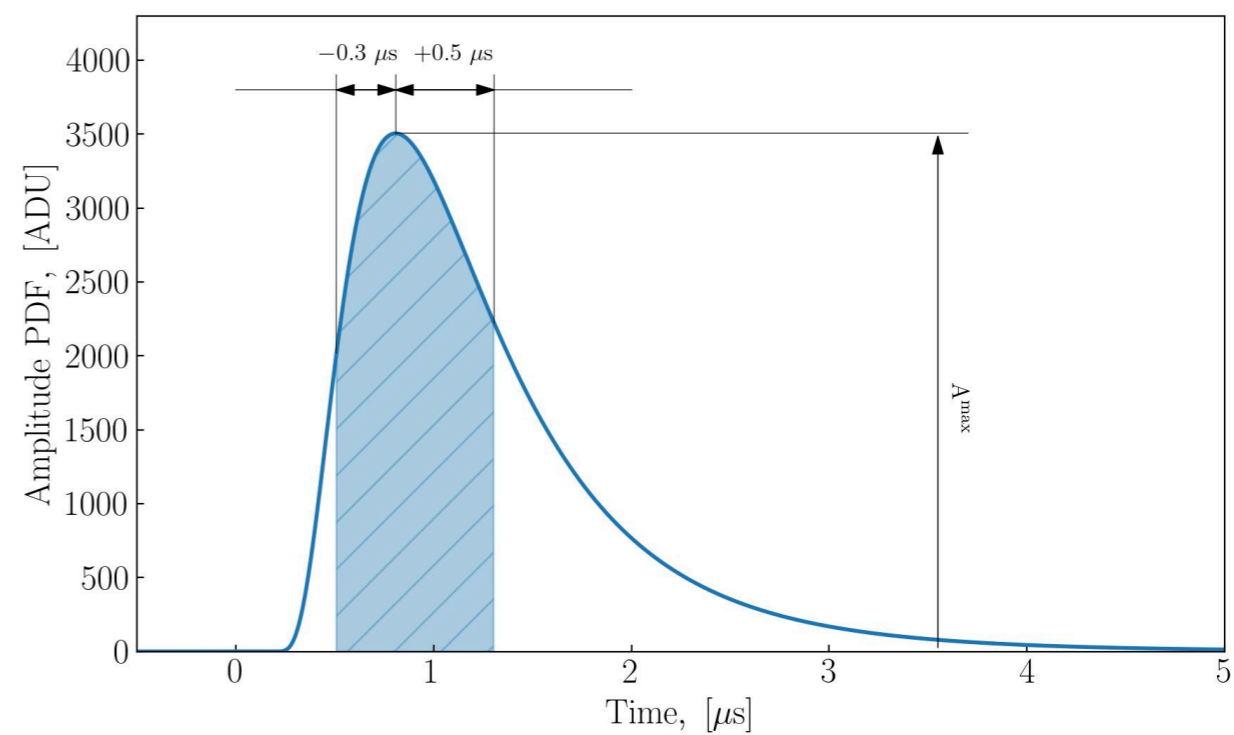

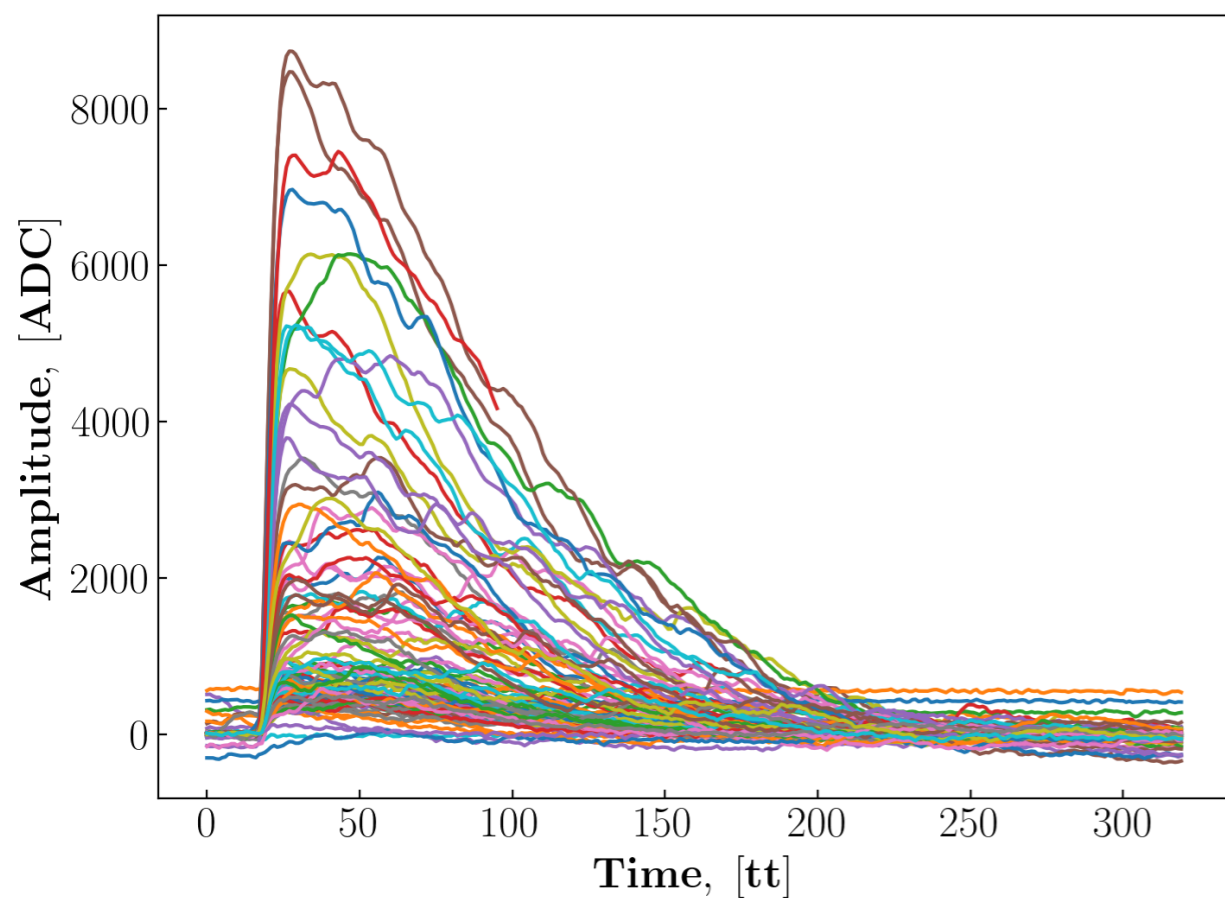

PNS data: first look

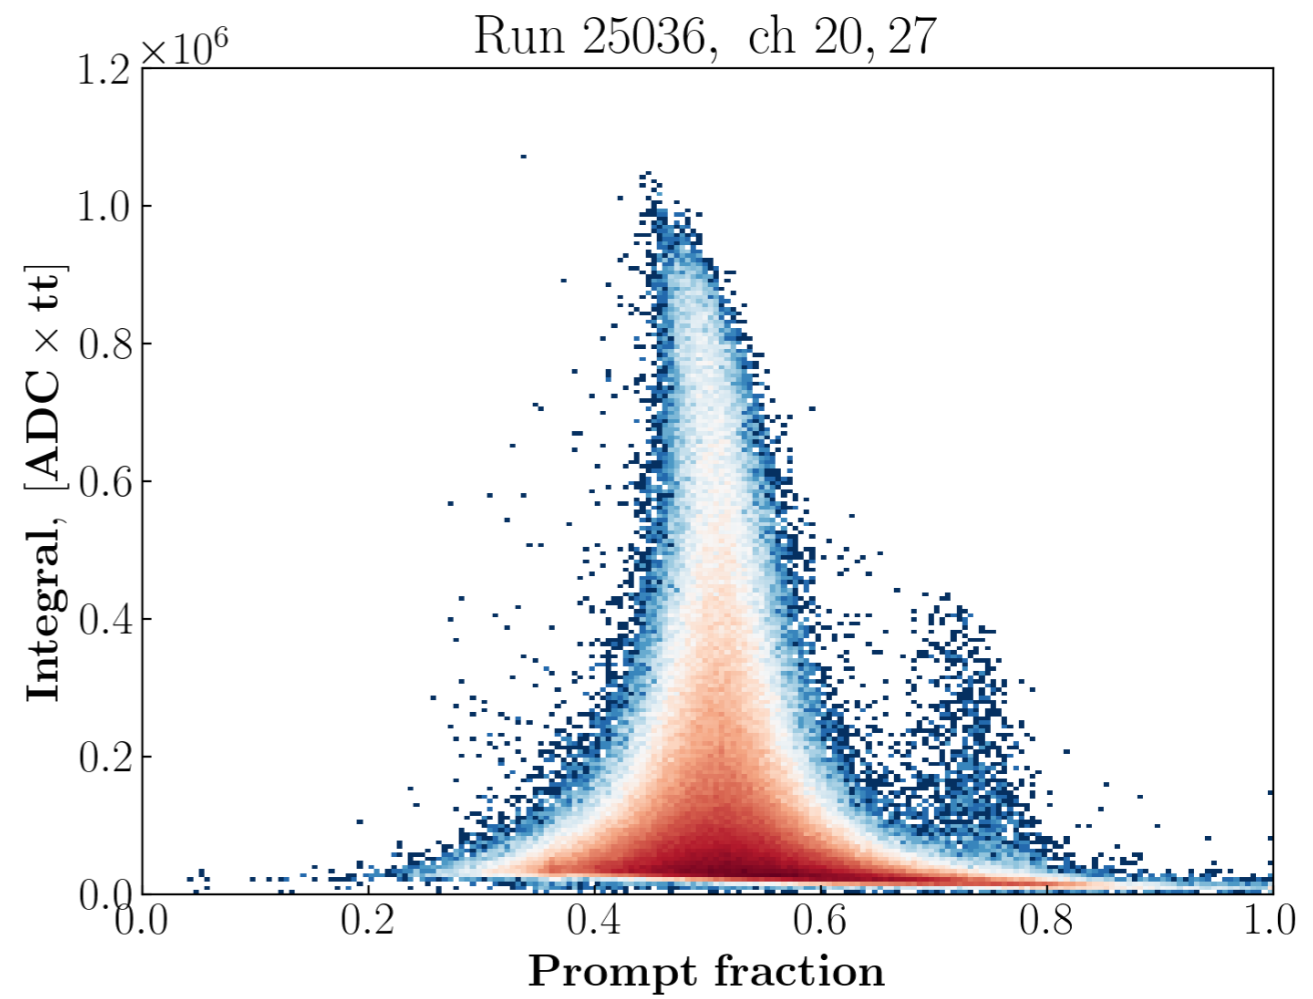

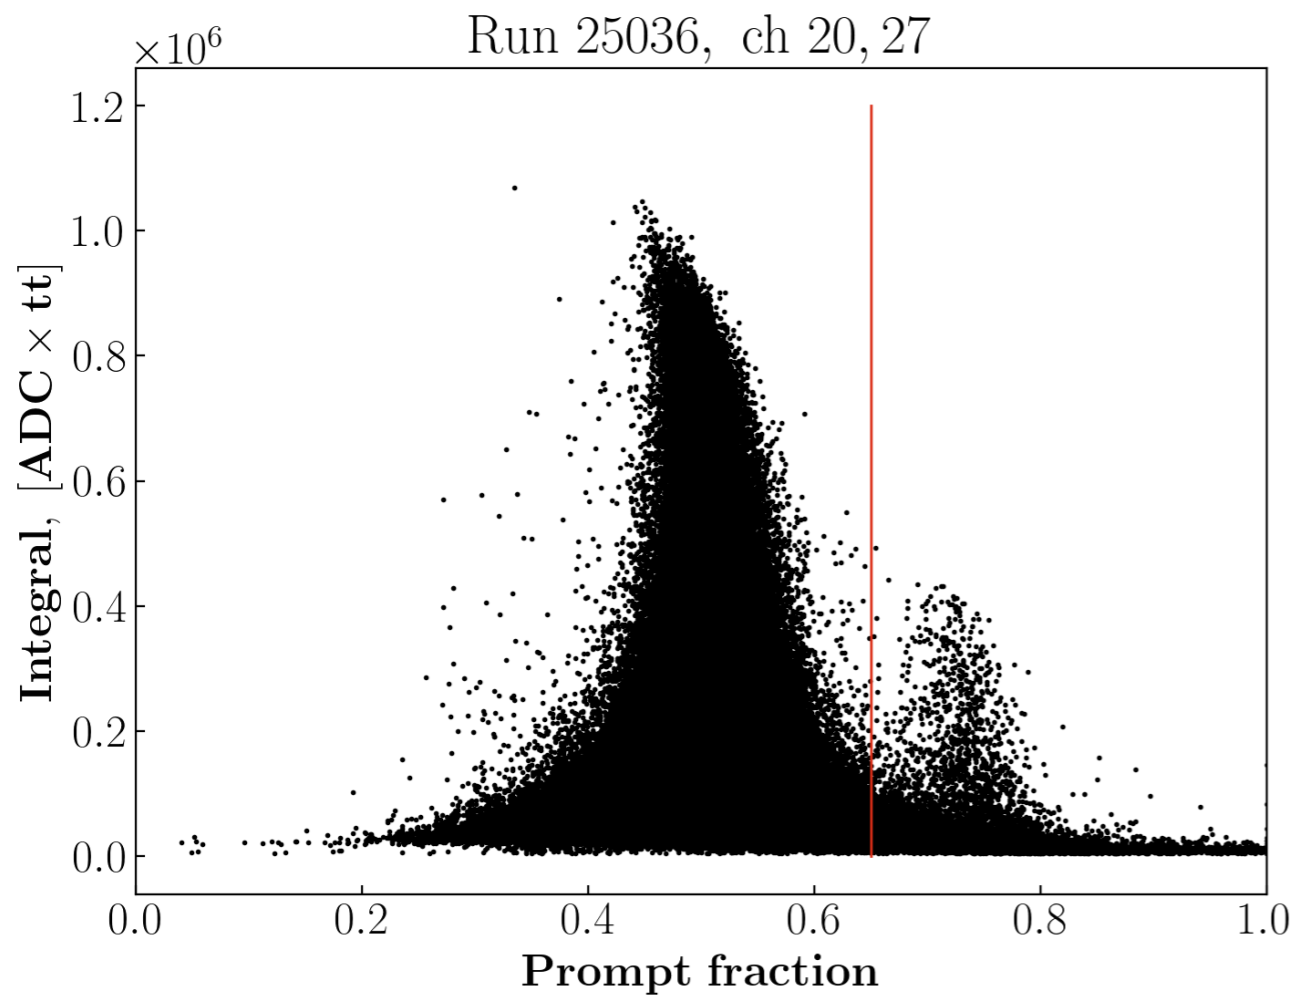

$$\text{Prompt light fraction} - F'_p = \frac{\int_{t_{\max}-0.3}^{t_{\max}+0.5} A(t) dt}{\int_{t_0}^t A(t) dt};$$

Full run 25036. Waveforms are pedestal subtracted and aligned by the rising edge.

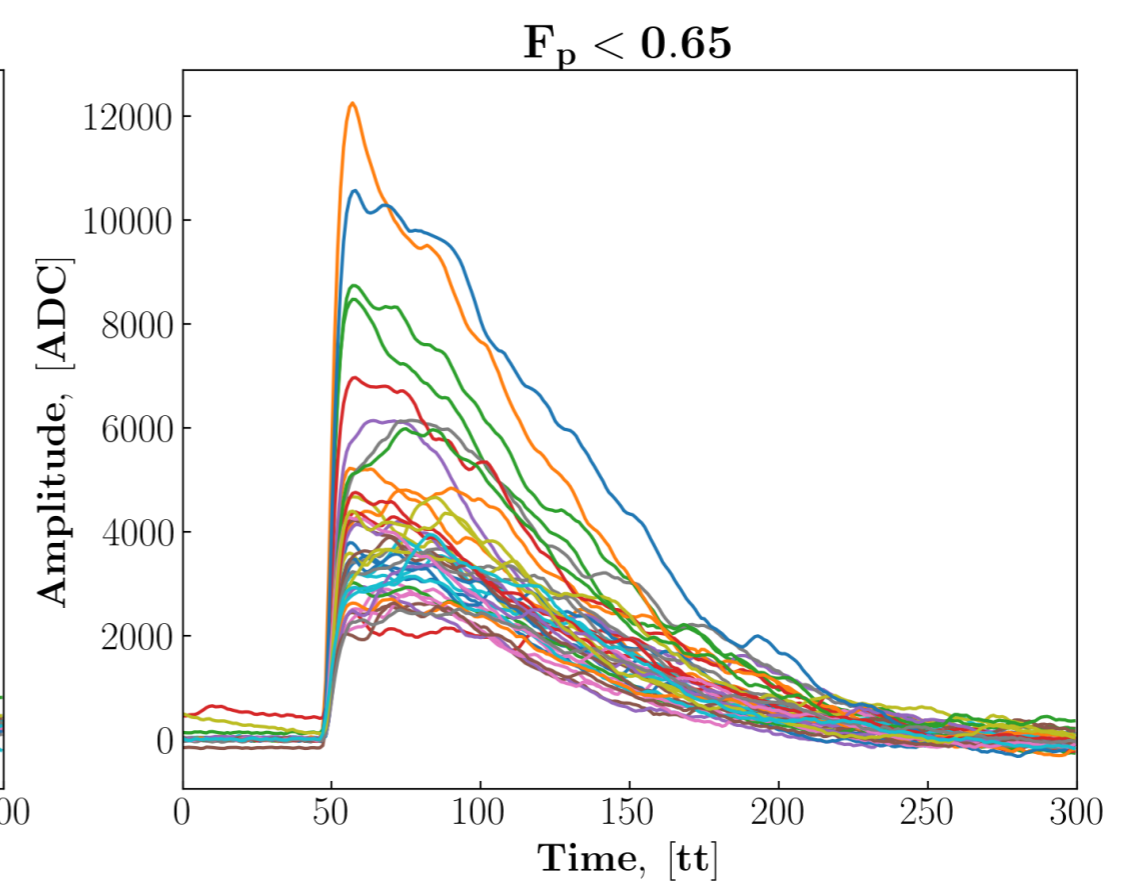

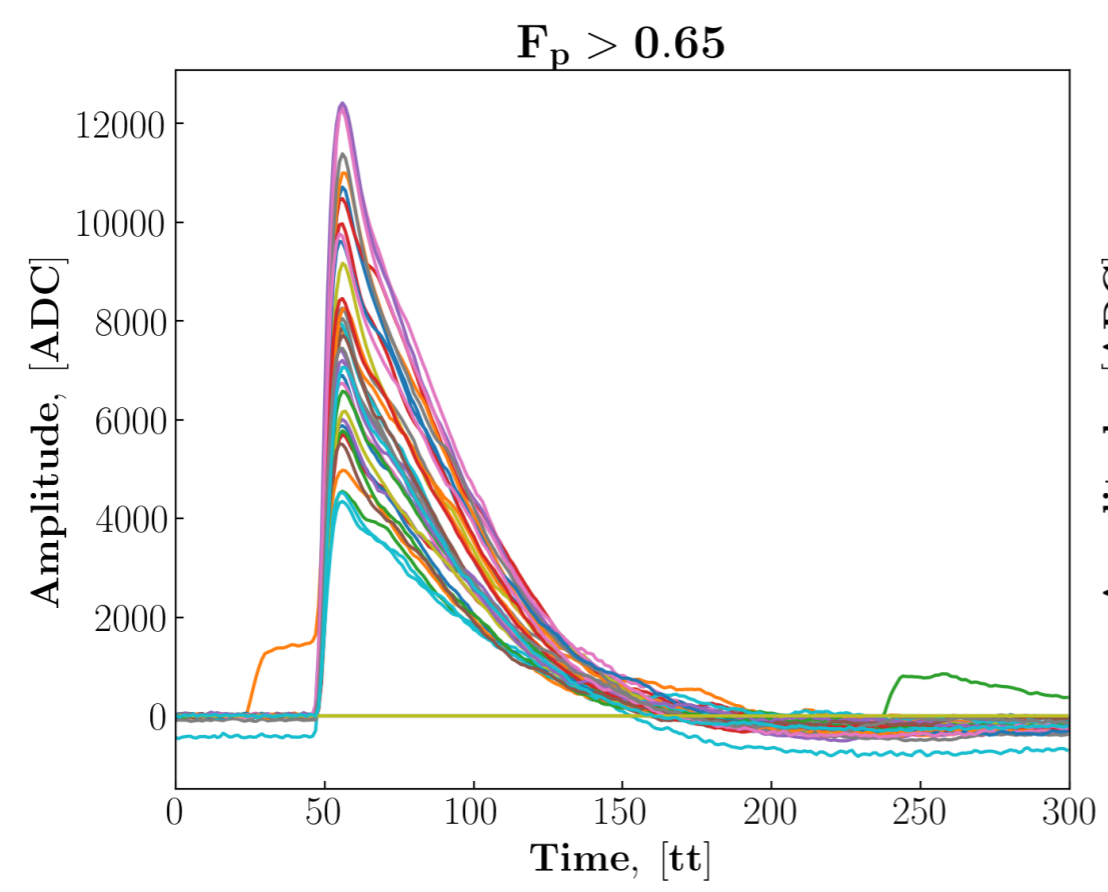

FPS plots

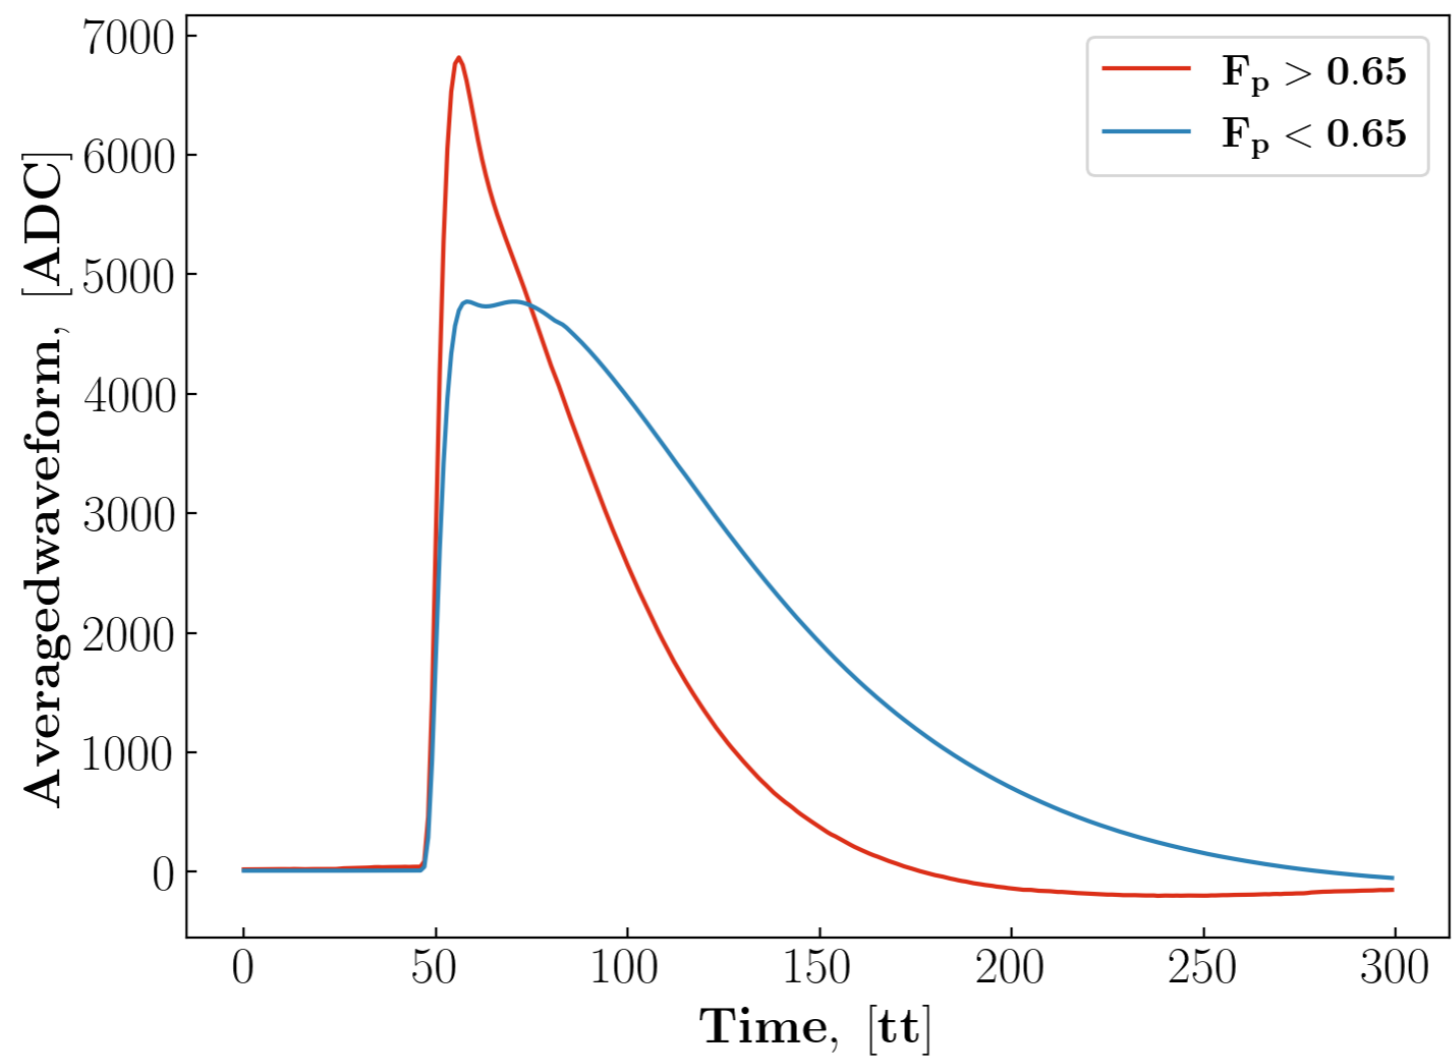

Waveforms

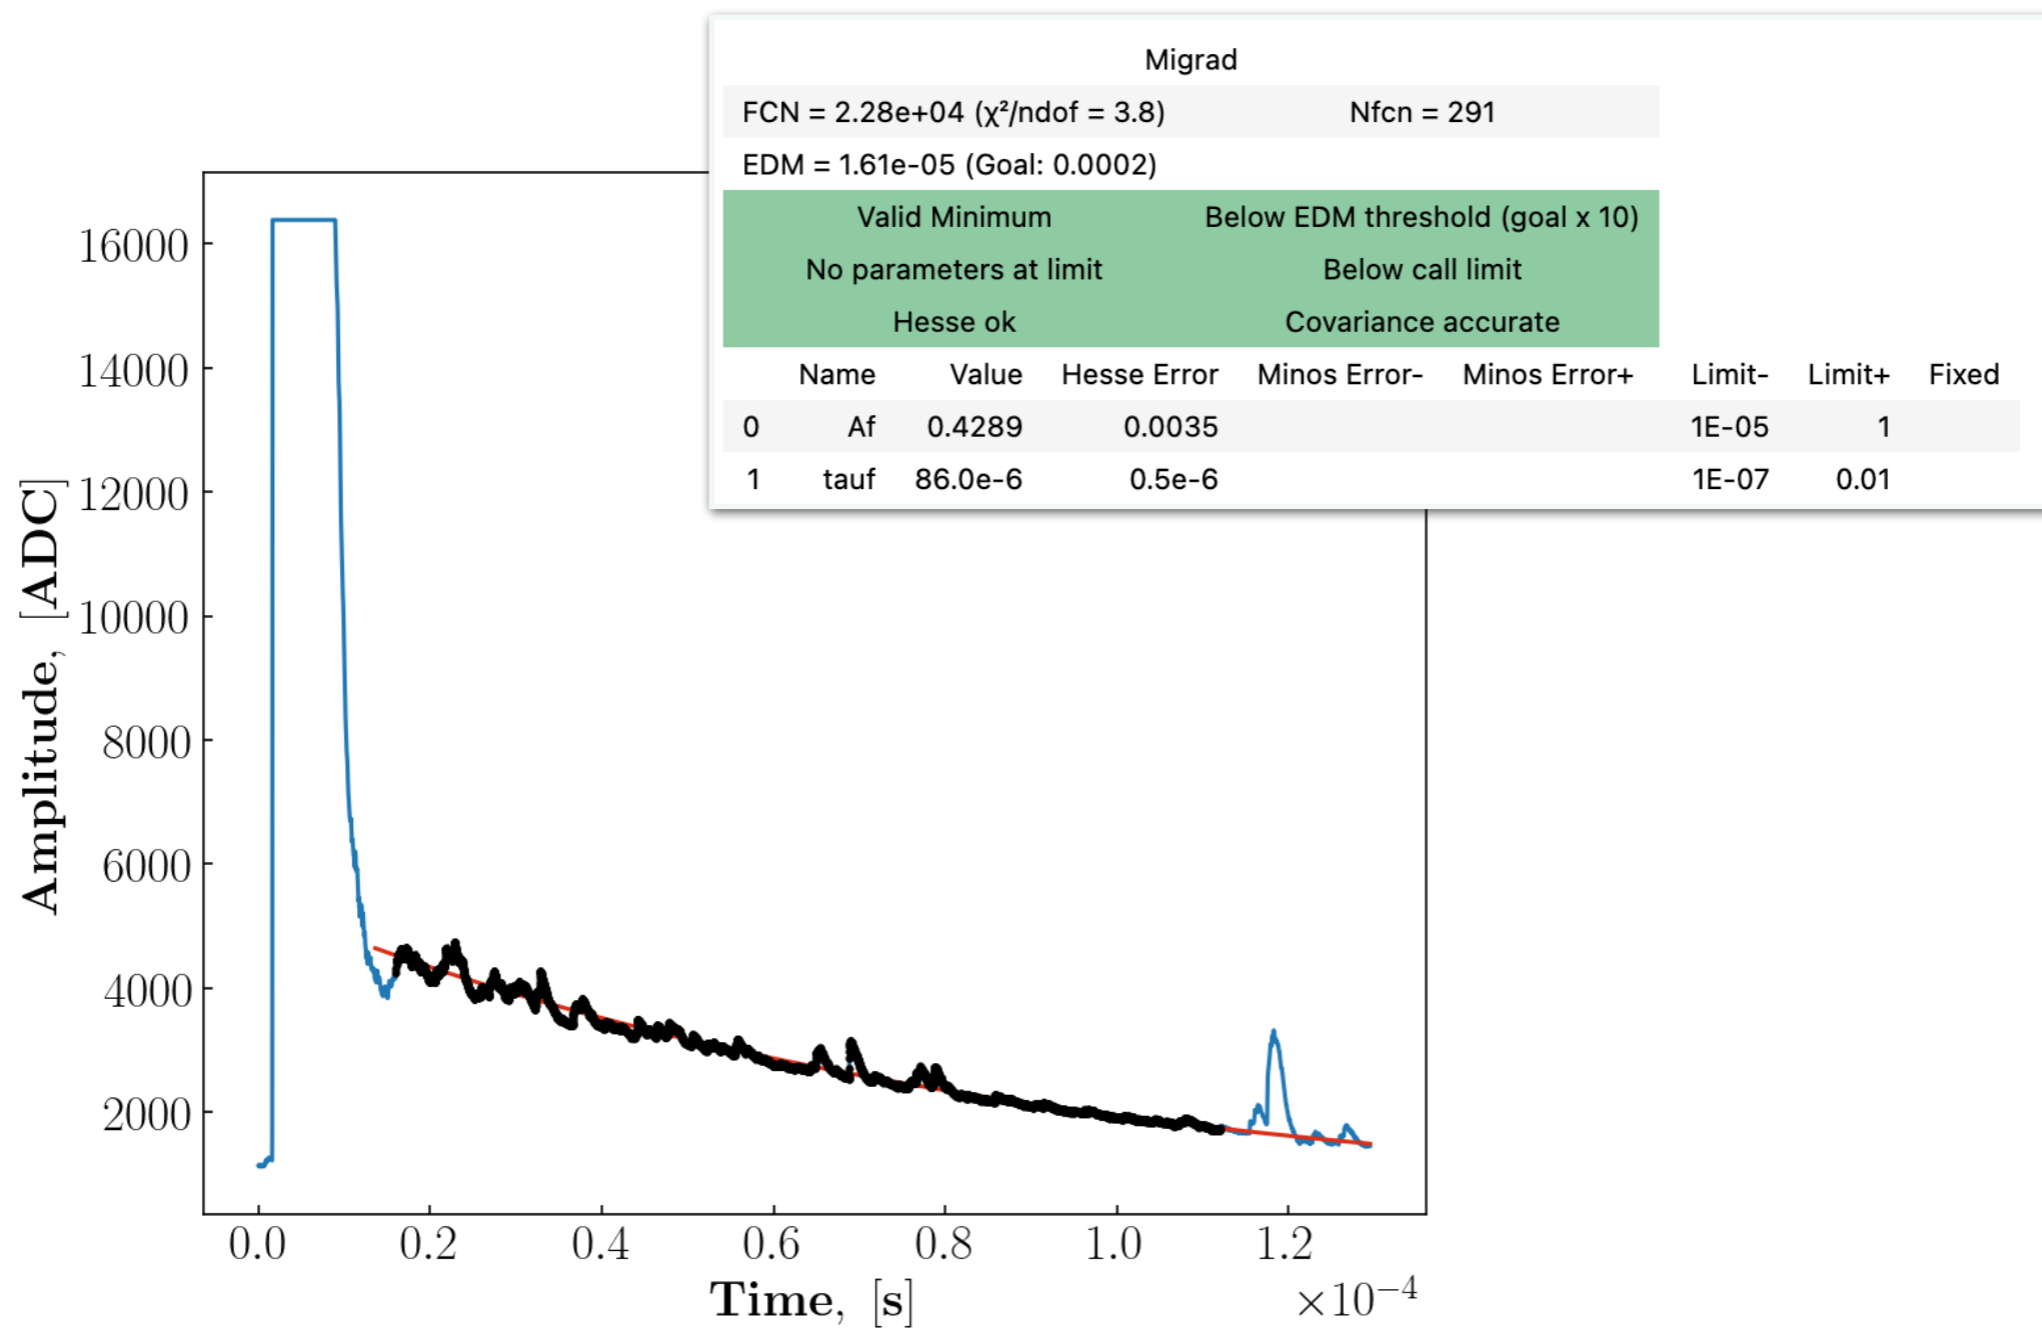

Waveform types

Waiting for the overnight cosmic run to find out if this effect appears while PNS is off.

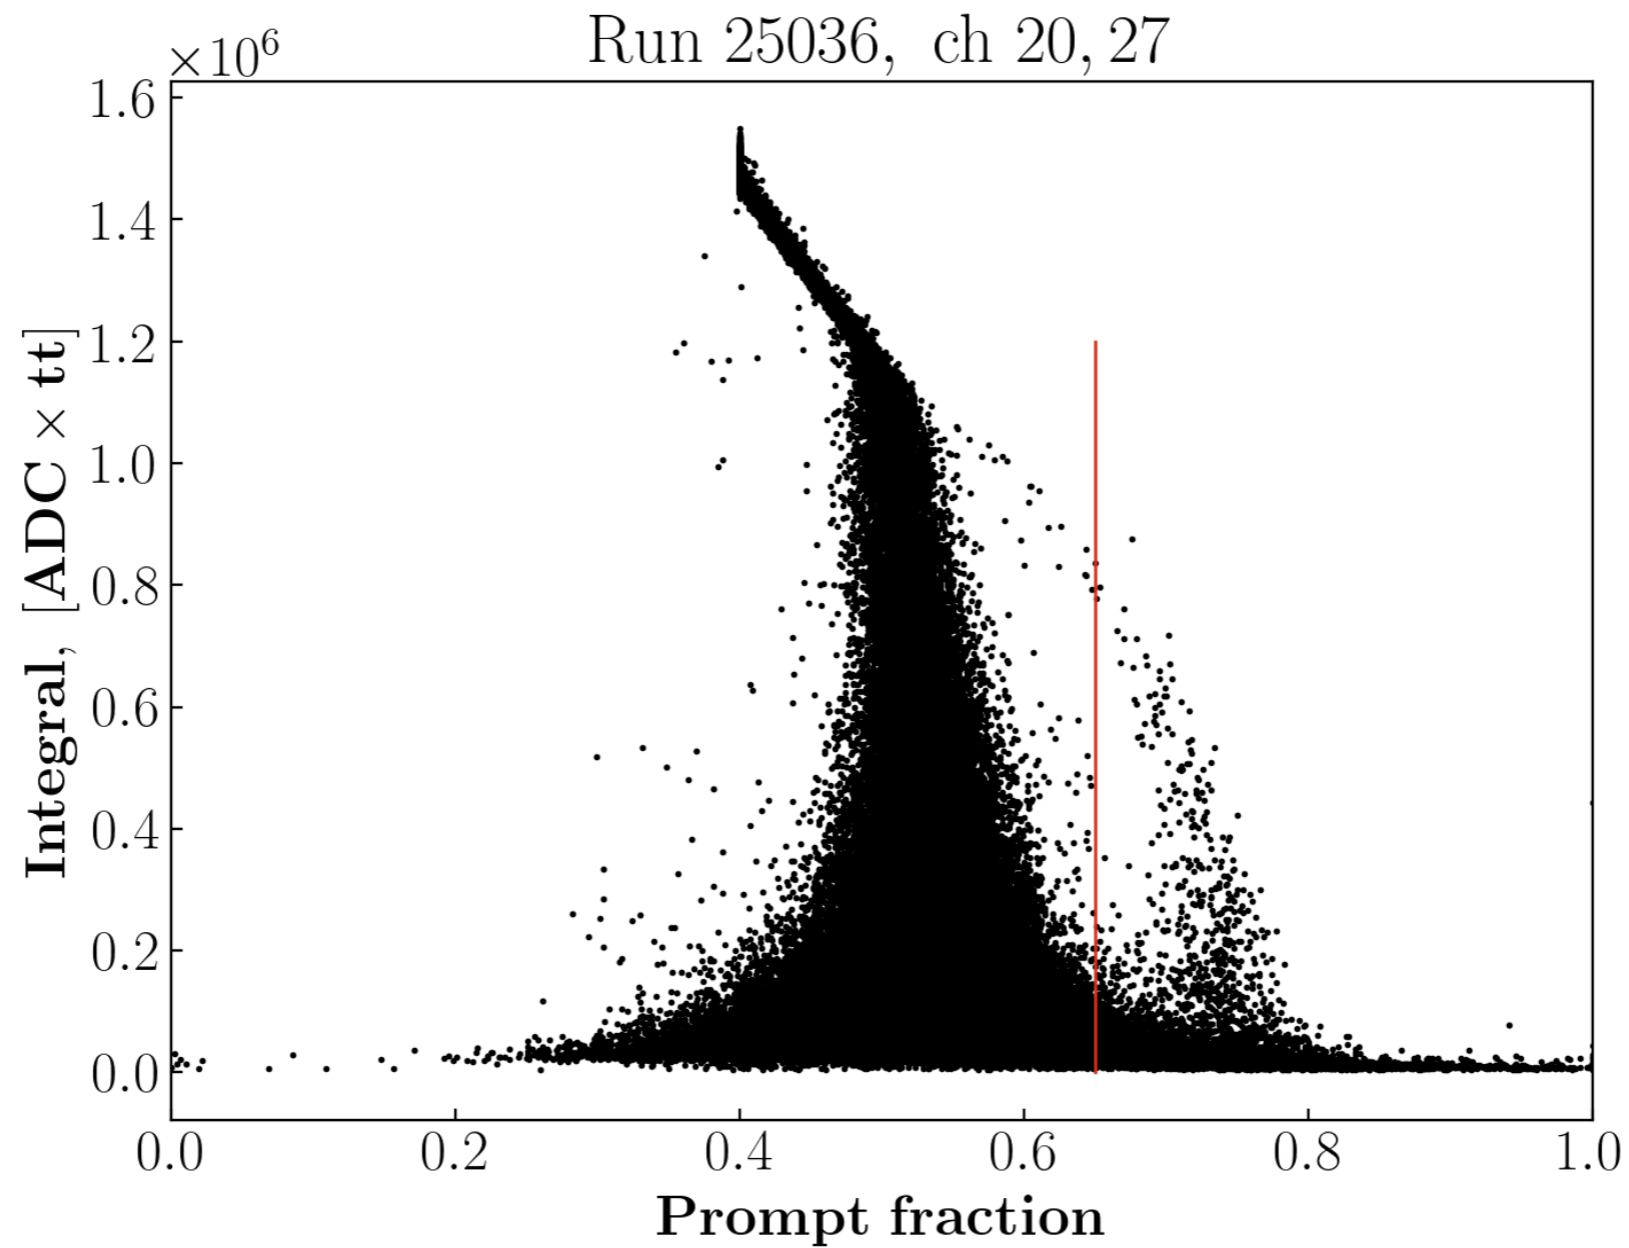

Tail fit

Allowing saturated waveforms

Run overview

Run No	Configuration	Trigger	Length
25036	TPC+PDS	4Hz	5h
25050	TPC+PDS	4Hz	5h
25068	TPC+PDS	4Hz	4h
25071	TPC+PDS	4Hz	3h
25080	PDS	40Hz	4h

PDS-wise run 25080 has most of the data.

Cosmic runs not mentioned here, but data was taken every night in TPC+PDS mode (1Hz).
