

CSAID operations report

Merina Albert on behalf of CSI group

May 7th 2024

Public Compute

HPC

Wilson cluster is on read only

GPGRID

GP Grid - Worker node upgrades to alma 9 still in progress. Roughly 360/512 done

jobsub01/02 , gpfrontend01, and decision engine only remaining servers running SL7

Kernel Reboots next Wednesday(May 15)

Our two GPU nodes have been installed with condor and ready for some testing with workflows. Ping Nick if you want to test.

CMS:

CMST1:

- Upgrading worker nodes to Alma9 is in progress (~78% completed, and all LPC workers are Alma9 now)
- HW replacement of secondary collector (cmst1mgr2->cmst1mgr3) is scheduled for next Monday
- CMS ETF MC-wn tests failing on Alma9 nodes -- still investigating

CMS SI :

- Top priority is upgrade of wmagent servers to Alma9 which is being delayed by package unreadiness
- Two new Alma9 servers for WMAgent (cmsgwms-submit9,10) have been prepared to replace 3 and 4 soon.
- cmsgwms-submit3,4 are being used by WMAgent developers for package upgrade test.
