

RENEW

Reaching a New Energy Sciences Workforce (RENEW) aims to build foundations for Office of Science (SC) research at institutions historically underrepresented in the SC research portfolio.

RENEW leverages SC's unique national laboratories, user facilities, and other research infrastructures to provide training opportunities for undergraduate students, graduate students, and postdoctoral researchers at academic institutions not currently well represented in the SC portfolio.

more info!

The hands-on experiences gained through the RENEW initiative will open new career avenues for the participants, forming a nucleus for a future pool of talented young scientists, engineers, and technicians with the critical skills and expertise needed for the full breadth of SC research activities.

Principal investigators, key personnel, postdoctoral researchers, and students of RENEW awards will be invited to participate in program research meetings and/or SC-wide professional development events.

FAIR

Funding for Accelerated, Inclusive Research (FAIR) aims to build research capacity, infrastructure, and expertise at institutions historically underrepresented in the Office of Science portfolio, including minority serving institutions (MSIs) and emerging research institutions (ERIs).

FAIR supports mutually beneficial relationships between MSIs and ERIs with partnering institutions to perform basic research in fields supported by the Office of Science.
