

Next NuSTEC Workshops

Jonathan Paley and Natalie Jachowicz, NuSTEC Board Meeting, June 28, 2024

The “In-Between NuInts” Workshop

- We have tried to hold a NuSTEC workshop every 18 months, 9 months out of phase with NuInt.
- Since NuInt24 was in April, the next workshop would be around January or February of 2025.
- March 2022, Tel Aviv: Charged lepton scattering
- March 2021, Online: “New Directions” workshop (aimed at providing early-career scientists opportunities to present and discuss their research).
- October 2019, Pittsburgh: NuSTEC workshop on pion production in the resonance region.

The “pre-NuInt” Workshop/School

- We have tried to hold a NuSTEC workshop or school 3-4 days prior to NuInts.
- The NuInt25 organizers have secured a venue for a workshop or school prior to the main event.
- NuInt24 pre-event: school with focus on using generators
- NuInt22 pre-event: none
- NuInt18 pre-event: SIS/DIS workshop.

Thoughts/Input

- With NuInt25 being in Europe, participation of early-career scientists will probably be higher than we was with NuInt24.
- The pre-NuInt25 event could see large participation if aimed at ECSs.
- Jorge has proposed a NuSTEC workshop focused on pion production above the Delta-resonance.
- Let's discuss!
