

# DUNE General Computing Meeting

Mike Kirby (BNL)

10 June 2024

# News and Discussion

- Special Talks today:
  - Framework Workshop - Mathew Muether
  - Interface Documents - Ken Herner
- Fermilab shutdown
- Update to the CS&C Consortium Organization coming soon

# Fermilab Shutdown

- Fermilab is going to shutdown (MinSafe, or something similar) for two weeks Aug 26 - Sep 6
  - During the closure, Fermilab operations and activities not related to the safe operations of DOE O 413.3B projects or necessary to safeguard lab facilities will be suspended. Personnel will not be allowed to perform any onsite or remote work unrelated to the laboratory's reduced operational status and DOE O 413.3B project activities.
  - LBNF/DUNE is a DOE O 413.3B project
  - open to affiliates and users who require access to support projects
- I am not aware of the official plan for computing during the shutdown.
  - There are discussions that a skeleton crew may be staffed to keep the lights on
  - DUNE should understand the impact that this will have on our operations
  - propose each working group within operations dedicate 15-20 minutes this week to considering what is the minimal set of things from FNAL needed to do what we need to do during the beam run?

# Upcoming meetings

- Next DUNE CCB on September 5th at 18:00 CEST.
  - updated on usage and delivery
- DUNE Collaboration Meeting Sep 9-13, Santa Fe, NM
  - Fact of the Day - NM is the only US state with state question™®
  - “Red or Green?”
- Circulate a survey for annual DUNE S&C meeting this week
