Computing and Shifting update

Nimmy Sarah Alex, Faiza Akbar

2x2 DAQ/Computing Meeting
August 08, 2024

- Shifting and Operations: No major issues regarding shifting were reported

- Instructions on the wiki are mostly up-to-date

- Current shifter checklists:

  - Cryo-DrainingShifts

  - Detector status

Figuring out to set IP addresses

Cameras

Hostname	FQDN	Allocated IP	IP set?	MAC Address.	Physical Location	Username	Password
acd-cam03	acd-cam03.fnal.gov	192.168.197.95	yes	B8:A4:4F:B7:A2:AC	MINOS Underground	root	argoncube
acd-cam04	acd-cam04.fnal.gov	192.168.197.96	yes	B8:A4:4F:B7:90:13	MINOS Underground	root	argoncube

Raspberry Pi

Hostname	FQDN	Allocated IP	IP set?	MAC Address.	Physical Location	Username	Password
acd-raspi01	acd-raspi01.fnal.gov	192.168.197.91	yes	D8:3A:DD:9F:51:62	MINOS Underground	acd-pi-01	argoncube
acd-raspi02	acd-raspi02.fnal.gov	192.168.197.93	yes	D8:3A:DD:9E:D1:57	MINOS Underground	acd-pi-02	argoncube
acd-raspi03	acd-raspi03.fnal.gov	192.168.197.94	yes	dc:a6:32:7d:0e:60	MINOS Underground	larpix	argoncube

UPS

Hostname	FQDN	Allocated IP	IP set?	MAC Address.	Physical Location	Username	Password
acd-ups01	acd-ups01.fnal.gov.	192.168.197.92	yes	00:20:85:D3:DD:C3	MINOS Underground power supply rack	admin	ArgonCube@ups01

- During the summer shutdown, we might power cycle Mx2 after an outage

- Maybe some planned hardware swaps

- <u>We need to make ECL entries for all the activities</u>

- Information asked in the forms:

  - Run/subrun: both before and after hardware reset/swap

  - Physical location of the board on the detector: **Crate-CROC-Chain-Board**

  - Old/New Serial Number of the hardware

  - Swap authorized and/or performed by

  - Reason for swap and location of the hardware piece after the swap (e.g. 'WH, 14th Floor, Lab-F or MINOS Hall')

- **Hardware/CROCE_swap**
- **Hardware/FEB_reset**
- **Hardware/FEB_swap**
- **Hardware/PMT_Box_swap**
- **Hardware/Power_Cycle**

I need this information for Mx2 Calibrations
