

CSAID Ops Report

July 23, 2024

CSI/GCO Operations Update

- VOMS: as of this morning, VOMS inits are failing. Expected to be fixed by end of day today
 - Degradation notice filed, have a token-based workaround for users having issues
- Ferry-VOMS: python script fixed on Friday and VOMS service now up to date with all users in FERRY
 - RPM in the works to finalize changes
- Fermigrid Issues: Partial progress on issue with Dune glideins not running on Fermigrid in recent weeks
 - Some missing commands in the new Alma9 docker container, fixed
- CMS SI: All the sl7 machines are upgraded or retired!
- LQCD: LQ cluster running at 90%+ capacity and availability
- HTCondor: Upgrade to 23.08 in progress through next week
 - Planning to upgrade on CMST1 (and FermiGrid) ITB, followed by all production workers next
 - LPC Schedds failing negotiation and having idle jobs -issues reported two weeks back
 - SLC6 workflows are experience failures at FNAL - still investigating
