Scientist Advisory Council

Home | Meetings | Resources

Current members

Nilanjan Banerjee	Kellen McGee
Daniel Baxter	Akshay Murthy
Jonathan Eisch	Vishvas Pandey, co-chair
Jim Hirschauer	Vaia Papadimitriou
Sudeshna Ganguly	Stephen Parke, co-chair
Bianca Giaccone, past chair	Cristián Peña
Kevin Lynch	Stoyan Stoynev
Robyn Madrak Plant	Douglas Tucker

2024 Scientist Advisory Council

- Bianka and Vishvas have the rights to modify it
- We need to at least update the member list/picture
- Do page “custodians” need to be updated too?

Current content

The Scientist Advisory Council includes about 15 scientists from across the organization, with different experience levels. The representing members are tasked with engaging in transparent and inclusive discussions about short- and long-term plans for Fermilab's research program. The council also addresses matters related to the careers and professional development of the laboratory's scientific staff and meets regularly with the lab director.

Council members serve two-year terms, with half of them rotating out each year. In early September, the laboratory director invites nominations via the *all-scientists* distribution list – self-nominations are also accepted. The current council, with input from the laboratory director, selects new members with terms beginning Oct. 1, ensuring representation from each scientific organizational unit.

Meetings

The council meets every two weeks to engage in insightful discussions on relevant topics. This often involves collaborative efforts with other departments and divisions within the laboratory.

For more information, please refer to the events, documents and meeting information provided below.

Meetings and documents

- Biweekly meetings
- SAC Indico
- SAC SharePoint

All scientists events

- All scientist retreats
- All scientist meetings
- Looking ahead of Snowmass Seminar Series 2023

We used templates and examples from other existing pages and our earlier content to populate it, after discussions among SAC members.

Resources

Stay informed by subscribing to the following mailing lists and visiting the helpful links below.

Mailing lists

The council communicates to scientists through the following mailing lists:

- fermi_scientists@fnal.gov
- all_ra@fnal.gov
- scientist_addendum@listserv.fnal.gov
- scientist-emeriti@listserv.fnal.gov

To receive messages from the council, please make sure you are subscribed to at least one of the mailing lists below:

- <https://listserv.fnal.gov/users.asp> [this doesn't seem a listserv mailing list address]
- <https://listserv.fnal.gov> [this is the home page of list serv]

Useful links

- All Fermilab committees and councils
- Internal to FNAL search (including internal content)
