

# Charged Current Coherent Pion Production by Neutrinos.

*Tuesday, 11 June 2013 17:02 (18 minutes)*

MINERvA (Main Injector Experiment for  $\nu$ -A) is a neutrino scattering experiment in the 1-10 GeV energy range in the NuMI high-intensity neutrino beam at Fermi National Accelerator Laboratory. MINERvA is measuring neutrino/antineutrino scattering off a variety of different nuclear materials (C, Fe, Pb, He, H<sub>2</sub>O). This talk will describe the current analysis on charged current coherent pion production by neutrinos.
