

Operations Meeting Report

S. Timm

25 Nov 2024

Running Experiments

- NP02 will seal cryostat this week, LAr transfer to begin on December 2
- NP04 running electronics tests in last week.

- From Elisabetta: Low Energy far detector production has resumed.

Services

- Fermilab Enstore maintenance lasted Tues 19 Nov to Fri 22 Nov..last day of it affected only one of the robots.. dCache files remained readable/writable.
- MetaCat outage from 20:00 22 Nov to 12:00 23 Nov, due to the underlying data proxy being unavailable.
- JustIN database tables filled up all disk space 11/22
- RAL schedds justin-prod-sched01, justin-prod-sched02 both offline over the weekend (and still offline this morning) perhaps due to an I/O heavy workflow that was submitted Friday afternoon.
- Some discussion on response times, off-hours call procedures, etc.
- Note new OpenSearch monitoring site
- <https://dune-os.monitoring.edi.scotgrid.ac.uk>

Sites

- Last week's problem with DUNE_CA_SFU RSE now fixed
- Problems at Oxford and Bristol now understood but not yet fixed
- HEPCloud testing at NERSC continues
