

Stuff I'm Interested in

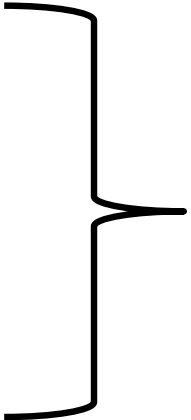

Stuff I'm Interested in

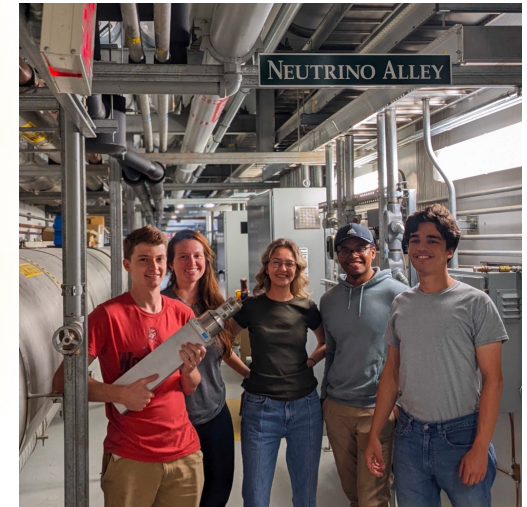

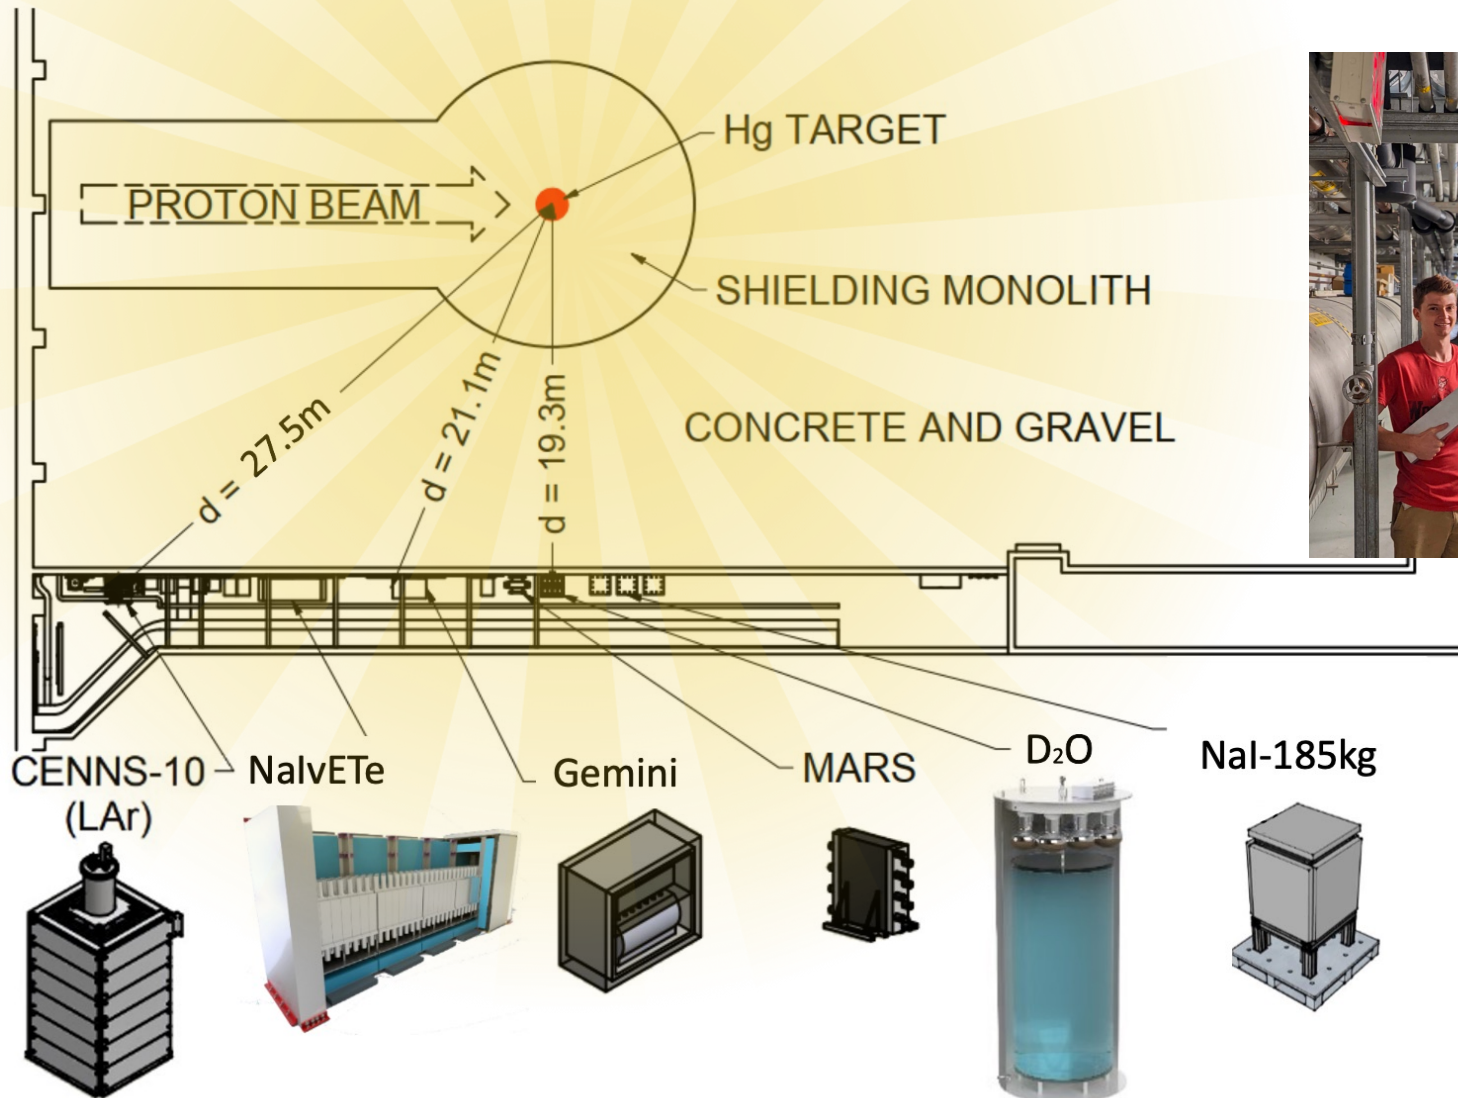

Experimental Collaborations

- Monopole, Astrophysics, and Cosmic Ray Observatory (MACRO) (1990-2001)
- Super-Kamiokande (1996-)
- Supernova Early Warning System (SNEWS) (1998-)
- Alpha Magnetic Spectrometer (2000-2004)
- KEK to Kamioka (K2K) (1999-2005)
- Tokai to Kamioka (T2K) (2004-)
- **Deep Underground Neutrino Experiment (DUNE, formerly LBNE) (2010-)**
- **COHERENT (2013-)**

current
main
effort in
low-energy
(<~ 100 MeV)
neutrinos
(although I like
the GeV-scale
ones too!)

Current main effort is in **elastic (CEvNS)** and **inelastic neutrino cross-section measurements** in Neutrino Alley at the SNS

Looking forward to
working with you all!
