

NuInt 2025 Satellite Workshop Discussion

Jonathan Paley, NuSTEC Board Meeting, December 18, 2024

Topical Workshop?

- It has become tradition to have a short (2-3 days) “satellite” workshop either right before or after NuInt:
 - NuSTEC school and workshop (pre-NuInt primer), Sao Paulo, Brazil, April 11-13, 2024
 - NuSTEC nuS&DIS Workshop, L’Aquila, Italy, Oct. 11-13, 2018
- We have requested the local organizers to secure a location for a workshop prior to NuInt 2025 for a NuSTEC workshop.
- So, what should the workshop focus on?

Some of *My* Ideas - for Discussion

- Neutrino and electron scattering in the S/DIS region
- New Directions
- Neutrino fluxes (accelerator, spallation, atmospheric)
- Pre-NuInt Primer (for those new-ish to the field)

Let's discuss!
