

DUNE Core Software & Computing General Meeting

Mike Kirby (BNL)

9 Dec 2024

Upcoming meetings/discussion

- DUNE Intro Tutorial - <https://indico.fnal.gov/event/67047/>
 - Tue Dec 10 at 9:00 am FNAL/time
 - 57 registrations (including me)
 - Covering basics
- DUNE CCB - postponed until Jan 21 - discuss projection updates later
- DUNE CRAB - Dec 20
- DUNE CS&C Meeting Dec 23 - propose focused discussion on resource projections

FNAL Comp. Resource Scrutiny Group

- FCRSG held last Thursday - Ken Herner presented
- details available here - <https://indico.fnal.gov/event/66534/>
- some good questions during the presentation
 - inclusion of beam/target simulation
 - questions about scale of current computing purchases and matching to DUNE needs
 - if we had 20% less, what would DUNE do?
 - discussion of tape costs and library configuration

Longer term meetings

- next CCB meeting Tue Jan 21 at 9:00 FNAL/16:00 CERN
 - update projections and usage
 - hope to include GPU projections, re-baselined tape, updated disk projections following NP04 final numbers
 - potentially important to provide peak numbers (disk and CPU)
- CERN Collaboration meeting Jan 27-31 - be thinking about talks
- DOE review of DUNE-US Operations - week of Feb 17, 2025
 - since DUNE-US ~50% DUNE computing, important to provide perspective on the other 50%
 - don't yet have a charge, but expect it soon

CHEP Proceedings

- deadline for submission is Jan 31, 2025
- ***Proposed*** timeline for internal review
 - 1 week review by CS&C - Jan 13
 - 2 week review by DUNE collaboration - Jan 20 - 31
 - Jan 31 - submit your proceedings
- make sure to contact the [DUNE APB](#) that you will be submitting proceedings
- encourage everyone to submit proceedings
