

## LARP Internal Project Review

### Remote connection information for Magnet parallel session

*Monday June 10 from 10:30 to 12:30 Central time*

We will be using the H.323 video system provided by Esnet, information at:

- <http://www.ecs.es.net/video/video-conferencing-welcome/>
- Helpdesk: email [trouble@es.net](mailto:trouble@es.net)

**Option 1:** from video room with H.323 equipment installed, or H.323 client on PC:

- Simply dial the Meeting ID: 7552771

**Option 2** Phone connection: +1 (510) 423-9220 (no toll free number). You will still have to enter the Meeting ID at the prompt, which is a little confusing since it seems to ask for a phone number. Just input the meeting ID 7552771.

**Option 3** Web streaming: this is useful to see the slides being presented, not so much for audio/video since quality is poor or it does not work altogether. Therefore it should be used in conjunction with the option 2 above for audio. Requires Java. In case of difficulties, sometimes it helps to try a different browser.

- Point the browser to <https://mcuhd1.es.net/>
- Go to the streaming tab on top
- Pick any name, conference ID is 52771 (without 75, that corresponds to mcu3), no PIN required.
