LBNE Grid Technology Survey

Maxim Potekhin

BNL

potekhin@bnl.gov

LBNE Grid Technology Survey

- ▶ Aimed at getting a broad picture of LBNE take-up of the Grid Technology, level of motivation and distribution of Grid expertise and capability
- ▶ Targeted to 33 designated LCC
- ▶ In 3 days of running the survey, received 12 full responses
- ▶ Will need to follow up when we have more statistics (in early 2014)
- ▶ Still useful even at this stage

First data from the Survey

- ▶ Roughly 50% of respondents interested in the Grid Technology
- ▶ Motivations cover the whole spectrum of possibilities, from better access to data, to being able to contribute resources, to validation of code on remote sites
- ▶ There are a few sites with significant Grid expertise and capability that we will work with in our “technology demonstrator” phase of the project.
