Single-Sign-On, Identity and Access Management at CERN

Friday, 9 November 2007 12:00 (30 minutes)

In order to streamline access to applications, CERN recently deployed Single-Sign-On (SSO) mechanisms along with changes in identity management and access management.

We will present the selected SSO solution and how it integrates with existing applications, as well as related changes in user accounts and roles.

Approximate Length (in minutes) (default is 15 minutes for Site Reports and 30 minutes for others, including questions)

30
