GUMS (Jay Packard)

Monday, 30 July 2007 13:15 (25 minutes)

How does GUMS help? How does SAZ help? How to manage GUMS.

How to deal with fact that GUMS is a single-point of failure.

Common techniques for dealing with different configurations (How to support a VO with VOMS, how to add local users, etc.)

Must leave at least 20 minutes for discussion

Session Classification: Session: How do we control access to OSG sites?
