LArSoft Status Report

July 22, 2014
Lynn Garren

Communication

- Workarounds will be communicated via direct email to <u>larsoft@fnal.gov</u>

  - Sometimes these have been buried in message threads

- Breaking Changes wiki page

  - https://cdcvs.fnal.gov/redmine/projects/larsoft/wiki/Breaking_Changes

  - not a replacement for Release Notes

- Please make an issue when you find a problem

Work on LArSoft wiki

- Katherine making changes

- new proposed front page

  - https://cdcvs.fnal.gov/redmine/projects/larsoft/wiki/Scratch_area_not_for_use_by_experiments

  - keep this page simple

  - comments welcome

Release Status

- v02_03_00 released July 18
  - root v5_34_18d
    - xrootd v3_3_4a
    - fix for NoVA bug that effects their event display
  - a new root implies new releases of art, genie, pandora, nutools, and ifdh_art
  - art v1_09_04
  - https://cdcvs.fnal.gov/redmine/projects/larsoft/wiki/Release_Notes_02_03_00
- weekly tag v02_03_01 in progress

Release Builds

- more automated with each release

    - scripting as much as possible

    - test and final builds done via Jenkins

    - much of this will translate to experiment builds

    - outstanding request for OSX build machine

- still tagging lbnecode and uboonecode

LBNE support

- need to convert product area from old-style to relocatable ups

- Kirby and Garren

- goal July 25
