

9th International Workshop on Neutrino Beams and Instrumentation (NBI 2014)

Tuesday, 23 September 2014 - Friday, 26 September 2014

Fermi National Accelerator Laboratory

Scientific Program

We anticipate contributions in the following topics:

Facility Operations Updates

Future Facilities

Primary Beam

Targets

Horns

Energy Deposition Modeling

Decay Region & Facility Concerns

Radiation Protection

Remote Handling

Secondary Monitoring

Neutrino Flux Prediction

Please contact the regional liaisons if you wish to make a contribution - initial program to be set in late August.

Americas:

Alberto Marchionni alberto@fnal.gov

Bob Zwaska zwaska@fnal.gov

Asia:

Taku Ishida taku.ishida@kek.jp

Takeshi Nakadaira takeshi.nakadaira@kek.jp

Europe:

Marco Calviani marco.calviani@cern.ch

Ilias Efthymiopoulos Ilias.Efthymiopoulos@cern.ch

Timing:

The program will start the morning of Tuesday, September 23, 2014. All sessions will occur in the 1 West conference room at Wilson Hall; adjacent to the cafeteria on the 1st floor. A welcome reception will occur on the evening of the 23rd. The afternoon of the 24th will be available as excursion time. The workshop will conclude the afternoon of the 26th. A T2K seminar will be presented to Fermilab at 4pm after the workshop close.
