

Search for $H \rightarrow \gamma^* \gamma$ and $H \rightarrow J/\psi/\gamma$ decays at CMS

A search for a Higgs boson decaying into two photons, one of which has an internal conversion to a muon or an electron pair will be described. Events are required have an opposite-sign muon or electron pair and a high transverse momentum photon. Additionally, upper limits on the branching fraction of a Higgs boson decays to a J/ψ and a photon will be reported.
