

Implications of SU(3)_F on Charm CP Violation

Thursday, 21 May 2015 09:00 (30 minutes)

We present recent results on improved predictions for charm CP violation in nonleptonic decays. These are obtained from a fit of a diagrammatic parametrization to branching ratios including linear SU(3)_F breaking. The predictions make possible future tests of the Standard Model once improved data is available.

Primary authors: Mrs MÜLLER, Sarah (Karlsruhe Institute of Technology); Dr SCHACHT, Stefan (Karlsruhe Institute of Technology); Prof. NIERSTE, Ulrich (Karlsruhe Institute of Technology)

Presenter: Dr SCHACHT, Stefan (Karlsruhe Institute of Technology)

Session Classification: Mixing and CP-violation I
