

Requirements and Interfaces

WBS 3.0

T. Lackowski

L2 Manager

8/21/2014

Communications

- The requirements, boundary between subprojects and impacted stakeholders is best established with face to face discussions using visual media.
- These face to face interaction were held in various meeting in both large and small group settings.
- The drawings and other contract documents are the result of these communications.
- The requirements and interfaces are also documented

Requirements

- Requirements are documented in approved DocDB [1088](#)
- Requirements are organized geographically.
- Approved by Level 1 and 2 managers

Table of Contents
