

Simulation & Beam Transport Systematics of Neutrino Flux in NOvA

Monday, 8 June 2015 17:00 (15 minutes)

We present the simulation & beam systematics study of the neutrino flux in NOvA. Systematic errors on the flux at the near detector (ND), far detector (FD), and the ratio, FD/ND, due the beam-transport and hadroproduction are estimated.

Primary author: Ms MAAN, Kuldeep Kaur (Panjab Univeristy, Chandigarh/Fermilab)

Co-authors: DUYANG, Hongyue (University of South Carolina); Prof. MISHRA, Sanjib (University of South Carolina); Prof. BHATNAGAR, Vipin (Panjab University)

Presenter: Ms MAAN, Kuldeep Kaur (Panjab Univeristy, Chandigarh/Fermilab)

Session Classification: Session 4 - The Fermilab Neutrino Program, and Mu2e!
